

Three Dorms And Apartment Area Named

Peter Cook Honored In Musical Program

Peter Cook, left, is served refreshments after a "Peter Cook - This Is Your Life" program presented by local music clubs at the college February 18. (Staff Photo by Roy Rogers Price)

Peter Cook, Austin Peay State music faculty member and composer, was honored with a "This Is Your Life" program February 18 by the Junior and Juniorette music clubs of Clarksville.

The program was held in the Clement Fine Arts auditorium. Hayden Jolly was the master of ceremonies. The script was prepared mostly by Mrs. Smith Crookard, with the assistance of Mrs. Peter Cook.

The program was scheduled in observance of American music and noted American composers. Much of Cook's musical life was

brought out; the highlight was when his young students were featured in various piano numbers.

President Halbert Harvill of APSC also helped Cook relive his musical career. A party was given in Cook's honor following the "This Is Your Life" program.

Two of his compositions, "To A Southern Pine" and "Kanawha

River," were played during the program.

Three buildings and the new apartment area at Austin Peay State have been formally named by the State Board of Education.

The new girls' dormitory has been named the Halbert Harvill Dormitory in recognition of President Harvill. Much construction has been done at APSC under President Harvill's presidency.

Philological Meet Tomorrow

The fifty-sixth annual meeting of the Tennessee Philological Association opens here March 2 and will go through March 4.

Dean F. G. Woodward is in charge of local arrangements. On his committee are Dr. Jerry Hodges, Hayden Jolly, Charles Waters, and Joseph Thomas.

The college Music Department will provide a musical program for a dinner at the Hotel Montgomery the night of March 3.

Richard Covington of APSC is to read a paper the afternoon of March 3 on "Martyrdom as a Tragic Focus in *Murder in the Cathedral*."

Other papers presented will cover such topics as satire, original music of Shakespeare's plays, three-dimensional reading, etc.

Halbert Harvill, APSC president, is to welcome the group at a luncheon on March 3.

The large dormitory for men, previously referred to as Main Dormitory, has been named for the present Governor of Tennessee and will be known as the Buford Ellington Dormitory.

The new men's dormitory near the gymnasium will bear the name of Jack Miller as a token of Miller's interest in the college.

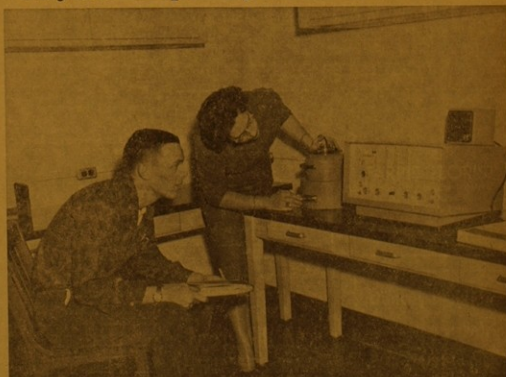

The new apartment area west of Drane Street has been named the Ernest C. Ball Village and Area. Ball is a member of the State Board and is said to have long been a friend of education.

Naming the large dormitory for Governor Ellington is in keeping with the board's policy to name large buildings on the college campus for governors.

The Administration Building is named in honor of former Governor Browning; the Science Building for Governor McCall and the new Fine Arts Building for former Governor Clement.

The two small new dormitories, one for men and one for women, were recently constructed, as was the apartment area for married students and faculty members. Students have been residing in the new women's dormitory for some time; occupation of the new men's dorm is expected soon.

Physics Dept. Opens Nuclear Lab

Miss Sara Wood, assistant professor of physics, shows Mickey Garland, a member of the nuclear physics class, the proper use of a Sealer and Geiger tube as a radiation detector. (Staff Photo by Robert Everett)

An important part of nuclear physics is the study of radioactivity, and senior physics majors at Austin Peay State College have recently begun their study of radioactivity in the newest and the most versatile undergraduate nuclear physics laboratory in the state colleges of Tennessee.

This latest laboratory addition to the Department of Physics, which will function in the areas of teaching and research, is under

the direction of Miss Sara Wood, who holds the Master of Science degree in nuclear physics from the University of Florida.

Nuclear physics students make their radioisotope measurements with Geiger counters, portable survey meters, scintillation counters, and with an ultrasensitive gas flow counter (property of the Biology Department).

For radiation analysis they use auxiliary apparatus including alu-

minum and lead absorbers, scaling timers, "pips" (the nuclear physicists' name for lead sample holders), and an assortment of radioactive sources ranging from Carbon-14 to Radium-226.

Even though the radioisotopes in use are not dangerously strong emitters, as a safety measure, radiation film badges are worn by all personnel who use the laboratory.

Kudo To Speak March 9, 10

Dr. Richard R. Kudo, emeritus professor of zoology, University of Illinois, will be guest lecturer at the Austin Peay State College Biology Department on March 9 and 10.

The Eta Pi chapter of Beta Beta Beta Honorary Biological Society will sponsor Dr. Kudo's visit to Austin Peay.

In 1921 he received his D. Sc. at the University of Tokyo. He had had 36 years of teaching and research in the Department of Zoology at the University of Illinois, becoming emeritus professor in 1954. He has served as visiting professor of Protozoology, Institute of Microbiology,

Coming Events

Mar. 2, 3, 4, Tennessee Philological Association meeting and banquet.

Mar. 6, 7, Aqua Belles water show.

Mar. 9, College Women's Chiffon show.

Mar. 10, 11, NCAA S. Central Regionals.

Mar. 11, Music clubs festival.

Mar. 14, Sub District FFA here.

Guys and Dolls Next

By BILLY ST. JOHN

Now that the Caine Mutiny Court Martial has come and gone, there remain two other productions in the Austin Peay Playhouse schedule for the 1960-61 season.

Caine Mutiny was one of the two plays presented in conjunction with the Clarksville Civic Theatre as is the arrangement used each season.

The other joint production to be presented this year is Arthur Miller's *The Crucible*. This witch-trial drama has a large cast hav-

ing 11 male and 10 female roles to be filled.

The music department will join the playhouses for the musical presentation of *Guys and Dolls* from a short story by Damon Runyon. The book for the play was written by Jo Swelling and Abe Burrows; the composer is Frank Loesser.

This production is tentatively scheduled for March. *The Crucible* for May. All My Sons, presented last November, makes the fourth play of the season's repertoire.

David Woodward - - "Man of Month"

David Woodward, "Man of the Month" for March, is one of Austin Peay State College's leading intellects. However, his high scholastic standing has certainly not been attained by retreating from campus activities and studying all the time.

He has been listed on the Dean's List a number of times and has participated in Academic Honors Day, as well as other academic pursuits. When the Laurel Wreath Society was recently organized, David was one of the first members (Lest it should escape attention, this society feels that Charles Waters of the English Department should be highly commended for helping this highly-intellectual society start at Austin Peay State).

David has also actively participated in many campus groups and activities. He is certainly worthy of this honor which has been bestowed on him by the All State.

A few days ago, a person asked me if I really wrote the editorials for the All State. Yes, I (the editor, Ray Rogers Price) do. If anyone else writes an editorial while I am the editor, that person will be given the credit - - he or she would certainly deserve the credit.

April Fool Stories?

Does any one like to write humorous stories? This student newspaper is in great need of material for the April Fool issue to be published on April 1.

Doug Stone, former editor of this paper, and I wrote almost all the material for the past two April Fool editions. Since I am at Donelson now and I much prefer to have a variety of writers.

Entries for the April Fool issue will be necessary to be considered on a competitive basis—that is, the editor will probably not use some of what is submitted. This is necessary because of the nature of the special issue.

Chas, please remember that the time to select the All State Award recipient isn't too far off now. Records of your year's work and of plans for the remainder of the year will be necessary.

Dependable Staffers Wanted

This editor would like to talk with persons interested in helping to publish the All State.

No one who merely wishes to be a "joiner" should apply. Some of the reporters who started on the staff this year have been slack in meeting deadlines and covering their beats. The editor, therefore, unfortunately had to do the complete work of several of the reporters in this issue. Most of the news in this issue was not, we regret very much to say, written by the reporters.

Dependable persons who are willing to do their part of this great task are wanted. This editor is not a workhorse and does not intend to do the work of other staff members.

Why Cut Lines?

Why do some students so persistently cut lines in the cafeteria? In a previous All State, this editor ran a streamer on the front page saying "Why Let Girls Cut Line In Cafeteria?" The next night, a girl commented, "I think gentlemen wouldn't mind letting girls cut line."

This editor felt like telling that girl that ladies wouldn't want to cut line in the first place.

Seriously, have you ever considered how unjust you are being to all the people who are behind you in the lunch line if you cut lines? Of course, maybe you don't mind "stepping on someone else's toes." Maybe you don't mind being inconsiderate of others, but that's somewhat selfish. This is supposed to be a civilized world, with civilized manners.

Realizes that all people have pretty much the same desires. No one likes to wait in a long line. The Army likes up for just about everything—no one cuts line in the Army. If a soldier cuts line, he is quite likely to have the entire company "beating the dust" out of him within a matter of seconds.

Is it fair for the fifth person in the cafeteria to be the tenth to be served? Hardly. It has happened often frequently that a person would just jump to a line and, after about 10 more students came in, he would still be the last in line. Is this fair to that person who got in his proper place?

One day a dorm matron let a girl know her line-cutting was observed. This should not have had to happen. Surely American college

Our quotable notables: "The

bad people are getting worse and the good people are getting better." — Evangelist Billy Graham.

Accordin' to Gordon

By GORDON "Peanut" JACKSON

What you got on - your mind. Somebody please tell me. Are you clapping for the one going into the game or the one coming out?

It seems that about the only "right" a person has these days is that right of choosing his own friends and if we hadn't got the Republicans out in time — that one would have been gone.

Do you know what Kasavubu said to Lumumba before they knocked him off? "Who ever heard of a name like Kennedy?"

Ouya aveya invetinda otta attenta etha "Igisa Atinla Onvention-ca".

I guess depressions always hit individuals instead of one big group. If this is true then your truly has been hit hard.

We're all going to have one though because some of the Federal Parlor have already closed from the lack of clients.

Hats off to the Gays' basketball team this year which has done an excellent job. There also seems to be a little more school spirit than in the past especially from the Martin family.

I think it is a shame that some of our young folks do not know how to behave properly in public. First, one should always cough real loud. If this doesn't work he should run and get a big drink of water. By this time he should have everyone's attention — then let'er go.

You tell me the Student Council ain't coming up in this world. Three years ago Don Alsup were blue jeans to make announcements in assembly, two years ago Charlie Gearhiser wore slacks to the rostrum and this year Sagg is wearing a neck-tie. I don't know about Alsup and Gearhiser, but I only had one suit and it had a hole in the seat.

A real staunch Republican asked what the Democrats would do when Kennedy went to get a haircut. I guess he'll have a news conference; that doesn't mean he can't talk. Besides, I heard Kefauver was going to pitch the first baseball in the Major Leagues this year. Maybe he can substitute a few minutes spare time during this interval.

In European History we have been studying about the governments in different countries. It appears that in England, the King reigns but does not rule while in the U.S. the President rules but does not reign. In one locale the Superior reigns and rules.

Since we're in the girls dorm, did you know that not a single girl has ever parked from Austin Peay. If you don't believe it, check the records.

Famous Last Words.
It's o.k. to be a loyal nephew, but your uncle Sam hadn't made his last will and testament and what good is social security at twenty-one.

"ON BECOMING HOME-MOTHER OF THIS DISPOSITION (C) I WHO LED TO BELIEVE THAT QUIET TIMES WERE TO BE OBSERVED AT ALL TIMES."

Letters to the Editor

IT IS TIME TO ACT

O.K., O.K., so Austin Peay's campus isn't the most exciting place in the world on the week-ends, but let's stop "griping" about our stagnated social condition and do something to make it exciting. I personally would like to see some social activities every week-end on this campus—regardless of whether it is a dance, round or square, bingo, or coed jam session, anything to increase the social relation of the coeds.

In my opinion, there are plenty of students who leave for week-end activities to some who would consider remaining on campus. If there were some social activities to stay for. Let's don't go "passing the buck" to the Student Council or faculty, because our week-end activities rate zero with the week-end's commuter.
My solution to this social problem revolves around the idea of each dormitory, boys, girls, and married students, alternating on planning social activities for a specific week-end. This plan would remove the burden of social activity planning from the shoulders of a specified few who are always ready to help out on these types of projects. I suggest that the dorm councils call meetings and decide which dorm shall be responsible for the next social activity. The girls' dorm started the social ball rolling in the middle of the week. Why can't the boys' dorm keep it rolling for a week-end activity?

Jerry Nix

CAMPUS COMEDY

"HE HAS A B.A., M.A., AND THIS YEAR THERE'S A PLOT TO SLIP HIS NAME INTO THE LIST OF PH.D. CANDIDATES."

students can be responsible for taking their proper place in a lunch line.

This is a competitive world, to be sure, but you don't have to cut someone's throat in order to be competitive. If you want to be near the front of the line, make it a point to get to the cafeteria earlier than you otherwise would.

This I know—You may think line-cutting is smart, but the ones who fall behind as a result of your mindlessness only think it's smart—sleazy.

Ready For Dinner

Ready for a dinner date are Jo Anne Dinamore and Don Sargent.

Jo Anne is a Freshman from Palmyra. She is 5'3" tall, 18, and has brown hair and eyes. Her major is Health and P.E., with a minor in Biology. Among her many hobbies are tennis and all water sports. Jo Anne is an active member of the P.E.M. Club, Newman Club, Aqua Belles, and Governesses.

Jo Anne's entire outfit may be purchased at Lee's Ladies Shop on Franklin Street here in Clarksville.

Don is a Junior from Clarksville. He is 39, 5'11" tall, has brown hair and blue eyes. Don's major is Health and P.E., with a minor in Art and History. His hobbies are tennis, golf, and art. He was on the golf team for two years and is an active member of the P.E.M. Club and the M.S.M.

Don's outfit may be purchased at Rankin's Men's Store on Franklin. (Staff Photo by Robert Evetta)

Read And Tell

By PATREVA CORNELL

Are you interested in our foreign neighbors?

John C. Caldwell uses the simple and brave folks of East Asia as the subject in his book entitled *Shil The Rice Grows Green*.

He divides his book into four interesting sections. In writing about the China coast islands, he makes these small places really come to life. Such characters as Turney and Matsui are discussed.

One of the bright spots in the Far Eastern section is Formosa. The massive revolution in land reform and rural rehabilitation since 1950 makes very interesting reading.

The third section deals with the Korean situation in 1953. He commends the United States in their job of helping to rehabilitate this area. Caldwell had been in this country for quite a while on a mission for the State Department.

In the final section, the author suggests ways to promote the cause of human freedom in East Asia. He believes that the plots of the Chinese Communists have backfired. Therefore, a real "vice-root's" revolution is in the making and guerrilla assaults will continue.

You may not agree with his ideas, but you may learn and understand a lot about these countries because the author has spent a great deal of time in these countries.

Women today have the political power to elect a U.S. lady president any time they choose. . . . They outnumber men of voting age by about 5,300,000 so the hand that rocks the cradle now can rule the ballot box, too.

WE WILL BURY YOU!

David Woodward - 'Man of Month'

By Sue Baggett

David Woodward is this month's "Man of the Month."

David is a history major with a minor in economics. He is a graduate of Clarksville High and a second quarter senior.

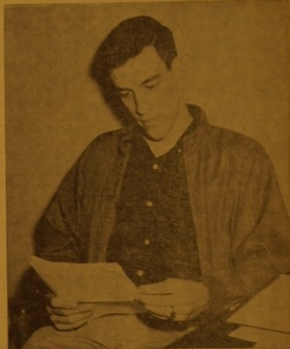

For the past two years, David has served as vice-president of the International Relations Club. He is the president of the newly-organized Laurel Wreath Society. He presented a paper to the club entitled "China's Threat to World Peace." David is the vice-president of another new organization on campus, the historical fraternity.

As a freshman and later as a sophomore, David was the elected Student Council representative. His junior year he was the co-chairman of the Homecoming activities.

David is a real sports fan and enjoys playing golf and basketball.

David is the recipient of a three-year National Defense Fellowship to the University of Georgia. He plans to obtain his doctorate in history before beginning his vocation as teacher.

The "Man of the Month" is chosen by a committee composed of Roy Rogers Price, All State editor; Nancy English, All State assistant editor; Sherwin Cliff, All State faculty advisor; Graham Sugg, Student Council president; Tom Savage, dean of students; Mabel Meacham, dean of women; and Patsy Dykes, physical education instructor.

David Woodward, "Man of the Month" for March and a studious person, looks over some papers. (Staff Photo by Roy Rogers Price)

Woodward Offered Fellowship

David R. Woodward has officially accepted a three-year fellowship granted in modern European history by the University of Georgia.

Woodward, a senior history major at Austin Peay State, is the son of Dean Felix G. Woodward of Cumberland Heights.

An Austin Peay State graduate, Wayne Beasley of Dickson, got the second of three such fellowships awarded by the University of Georgia's Department of History under provisions of the National Defense Education Act of 1958.

Woodward will start work on his doctor's degree in the fall at the Athens, Ga., university. He will have to pay no out-of-state tuition. The fellowship provides for a stipend of \$2,000 the first year, \$2,200 the second year, and \$2,400 the third year.

The N.D.E.A. fellowship is designed to assist worthy students who plan to become college teachers, as Woodward does. A number of National Defense fellowships are awarded through colleges and universities throughout the United States in various subject fields.

MAY WE GLOAT?

We hate to boast too much about the prowess of our crystal ball but we don't get a great many opportunities to do so (publication every two weeks). So then, we don't feel it's entirely unjustified to remind a few of the "doubling Thomases" as to the reliability of our "aid to prognostication" and to tell those who haven't heard of our instrument about its accuracy.

Nearly a week prior to gametime of the Governors' clash with eighth-ranked Kentucky Wesleyan, a team that had earlier handed Austin Peay a 57-66 shellacking, we told fans that the Govs would be on the long end of the final count, by a five-point margin. As it was, APSC trimmed the Panthers by only three, but there was a little mist on the crystal ball and could possibly account for the two-point error.

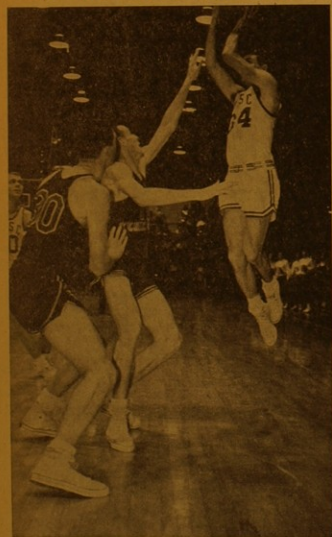

LET'S HAVE ANOTHER LOOK IN THAT CRYSTAL BALL.

We thought maybe another look might put some readers (fans, basketball team, Coach Aaron, etc.) at ease as to the outcome of future events. So, here 'tis.

We see the Govs in the finals of the NCAA South-Central Regional tournament being held in the Austin Peay Memorial Gym. The crystal ball tells us APSC has just upended this same Kentucky Wesleyan team and in doing so has earned the nod to appear in the national finals of the NCAA tournament to be held in Evansville, Ind., March 16, 17, and 18. They are one of the eight teams in the tourney and we see them in the first round of play. . . Well, more about that later.

Any inquiries on these predictions or questions concerning any predictions you want made should be addressed to: The Crystal Ball, From This Corner, c/o the All State.

For The Winning Point

Jim Beshears sends the ball up in the play that won the February 13 game for APSC. Beshears missed the basket but Roger Davis tipped for the winning points. (Staff Photo by Donald Reese)

APSC Is NCAA Site

The selection of Austin Peay State College as the site for the South Central NCAA Regional basketball playoffs was announced by Walter D. Bryant, member of the NCAA College Tournament Committee.

The tourney will take place in Austin Peay's Memorial Gymnasium March 10-11 with host team Austin Peay, Belmont-Aubrey, University of Chattanooga, and Kentucky Wesleyan partici-

pating.

Winners of the eight regional playoffs will meet March 16, 17 and 18 at Evansville, Ind. to determine the NCAA college-tourney national champion.

Pairings will not be announced until later this week.

Officials assigned for the meet are Claude Tankley, Julia Seved, John McPherson, and Hickman Duncan.

Intramurals Half Through

As the intramurals progress the Pounders and Rockets continue to set the pace in their respective leagues.

Both teams are sporting 3-0 records.

Teams have now completed half of the schedule. The winners of the Blue and Red Leagues will meet in a play-off for the championship March 9 and 10.

Beshears On Top

After flirting around with the Austin Peay State single game scoring record for two months, fabulous junior forward Jim Beshears cracked it wide open February 9 with a 43 point effort in leading the Governors to a 101-67 win over Bethel College of McKenzie.

Beshears' big 43 points goes down in the record book as five more than the old mark of 38 which was set by the terrific Tom Morgan some five years ago in Memorial Gym against Union University. The 43 points came on 13 of 30 field goal attempts and 13 of 20 free throws. Beshears' 30 field goal attempts is also a new school record, the old one being 28 and also held by Morgan against Union.

A native of Morton's Gap, Ky., Beshears transferred from the University of Kentucky last year but saw action in only three contests and consequently didn't even score. When the Govs began to falter at the beginning of the present campaign, Coach Dave Aaron inserted Jim into the starting line-up and he responded with 21 points. Since that sixth game, Jim has led the Governors 11 times and on six occasions has passed the 30-point mark.

Beshears has scored 412 points in 22 games for an 18.8 average and has led the Governors to a 15-7 seasonal mark and their fifth consecutive Volunteer State Athletic Conference basketball championship.

A terrific jumper, Beshears was one of the most widely sought prep stars ever to come from the Bluegrass State. He is an all-star from strong South Hopkins.

Govs Clinch VSAC Title

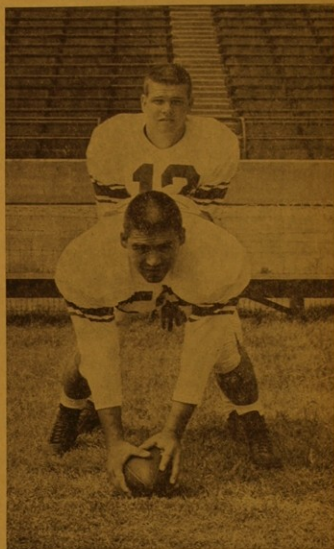

Coach Dave Aaron's Governors wrapped up their fifth consecutive Volunteer State Athletic Conference basketball championship February 11 with a routing 85-68 victory over UT Martin Branch.

The win, avenging an earlier one-point loss to the Martin Branch Vols, gave AP State 15-7 season record and 8-1 within the VSAC with only Belmont remaining on the conference slate.

In regard to the grueling seven-game road trip, Aaron said, "It has been one of the finest road trips since I came to Austin Peay. We beat Arkansas State (84-75) there and that was no easy task, plus Bethel (101-67) in which Governor forward Jim Beshears scored a whopping 43 points to break the single game scoring record." Earlier the Govs had beaten David Lipscomb 69-48 and Union 81-63, while dropping two contests at the hands of Kentucky Wesleyan and East Tennessee State.

Beshears, 6'2" junior sensation from Morton's Gap, Ky., continues to break the nets and added 106

Two, Too Tough!

Richard Moore and Joe Cincotta, both juniors, will see much action next fall. Joe is a tough defensive line-backer and hard-charging center on offense. Moore will be thrilling fans next year with some of his long-range aerials.

Two Govs Make All-VSAC

Jim Stewart, 5'10" senior captain, and scoring ace Jim Beshears have been named to the 1960-61 Volunteer State Athletic Conference's honor team.

The 10-man All-Conference team was selected by a poll of the 12 conference coaches based on regular season performances.

Stewart, named to the conference's second team last year, is the Govs' number 3 scorer on the team and is definitely the "take charge" boy. With the regular season completed, Stewart has scored 250 points in 23 games. The selection of 6'2" junior forward Beshears came as no surprise to anyone connected with VSAC basketball. The Kentucky wonder has scored 454 points in 25 contests for an average of 18.1 per encounter. Jim smashed the

points in three games last week to run his seasonal total to 412 in 22 games for a 18.8 average.

Coach Aaron was also singing the praises of 6'3 senior Jim Henderson for his clutch rebounding and shooting on the recent road trip. After an early season slump,

Beshears Stewart

single game scoring record with a 43-point performance against Bethel.

Others named to the squad were: Larry Petersen, David Lipscomb; James Pritchett, UT Martin Branch; Joe Aden, Union University; Charles Tester, Milligan; Chris Jones and Clark Bryan, Carson-Newman; Tom Springfield and Jerry Edmonds, Tennessee Wesleyan.

Henderson has regained his old form that prevailed last season when he set the single-season school record for field goal percentage.

FINAL VSAC STANDINGS

Track Meet Tomorrow

George Fisher, head track coach, has extended a special invitation to non-scholarship athletes for the upcoming 1961 track and field season. All prospective tracksters may respond to this official call by meeting with the squad tomorrow, March 2, at 2 p. m. in Memorial Gymnasium.

Grid Practice Ends for Spring

By HOWARD SUITER,
Asst Sports Editor

Through rain, shine, sleet and snow, the football Governors finally finished spring grid practice.

Coach Art Van Tine said, "I am well pleased with the spring drills. Our backs have run like a back should for the first time since I've been here and our line - blocking is greatly improved. In all, our total offense is 100 per cent better than last fall."

The Gavs boast a hard-nosed group with the major weakness again being a lack of depth.

Spring practice ended with a Red-White game February 17. The Red team emerged victorious 184 with Cobb Parker doing a superb job running offensive quarterback for both teams. This was necessitated when the only other quarterback, Richard Moore, suffered a broken ankle earlier in the spring.

For he is our peace, who has made us both one, and has broken down the dividing wall of hostility.

—(Ephesians 2:14)

Here is a suggestion of a new dignity which comes to a man who has found himself drawn into this fellowship of Christ. It is a newness that comes from a sense of oneness with others in Christ.

LITTLE MAN ON CAMPUS

How To Encourage Seniors To Teach?

New Haven, Conn. - (I. P.) - How do you persuade an outstanding college senior who is undecided about his future career that he ought to go into teaching?

One answer, as practiced at Yale, is to give the bright young man an actual taste of college teaching. The program, known as the Carnegie Teaching Fellowships, has nine Yale seniors from

the Class of 1960 enrolled.

So successful has been the teacher recruitment experiment, now in its third year, that Yale has earmarked \$1,800,000 out of its \$60,200,000 capital fund for the permanent endowment in support of the program when the Carnegie grant runs out in another year.

Chief difference of Yale's program in comparison with the various other teacher training programs in operation here and other universities is that this program seeks to recruit the bright college graduate for teaching. The other programs award fellowships to men and women who have already made that decision. Past experience has shown that the senior, undecided about his career, rarely chooses teaching but invariably drifts into a higher paying job in business and industry.

"The most unique aspect of the Carnegie program is its power to reach a segment of students which seldom considers teaching as a career," Associate Dean Richard C. Carroll, who is in charge of the program, said. "I describe this segment as the bright young man who has also displayed an active leadership outside the classroom,

men prominent in debating, the publications and athletics."

A Carnegie Fellow is enrolled in the Yale Graduate School and takes a few advanced courses in addition to his teaching. If, after the year's trial he decides to go on

with teaching as a career, he assumes the regular graduate course leading to the Ph. D. degree. In the year of trial, he receives \$3,750, of which \$2,400 is base pay. The remaining \$1,350 goes for tuition and fees.

the Student Center too.
J. Allen - APSC "57"

Physics Dept.

(Continued from Page 1)

One quarter of modern physics, which is the study of discoveries leading to an understanding of atomic energy, and two quarters of nuclear physics make up an important part of the program of senior physics majors at Austin Peay.

Experiments performed by students of nuclear physics include scientific investigation of the fundamental properties of radioactive decay, the interaction of alpha, beta, and gamma radiations with matter, and many practical aspects of the handling and use of radiostopes and the instruments associated with such use.

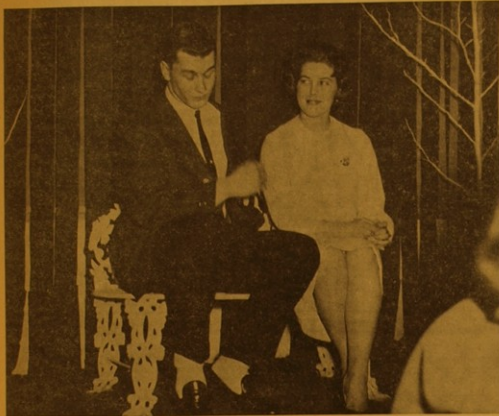

Nuclear research at Austin Peay is already underway. "Operation R-1-60" may be observed in action in the halls and rooms of the various buildings, and on the sidewalks of the campus. The particular apparatus being used is an air sampler which deposits radioactive particles from the air onto filter paper.

The filter paper is then "counted" in the nuclear laboratory, and a careful chart is kept of the intensity of the activity in the air. The sampling of air is only one phase of an extensive environmental radiation monitoring research program sponsored by the city of Clarksville and carried on by the physics staff under the direction of M. R. Mayfield, head of the Department of Physics.

The chief purpose of this research is to establish in the Clarksville area a present-time background count of radioactivity in air, water, milk, and certain solid foods. Once established, this count can be used as a standard, and frequent spot-checks will reveal any change in radiation intensity. Thus a dangerous fallout situation can be readily detected and immediate measures can be taken for the protection of the populace.

"Students of nuclear physics soon learn that radioactivity should be respected but need not be feared," commented Miss Wood. "Careful observance of certain laboratory regulations is of course essential. Strict adherence to the regulations adapted from a list of those in use at the Oak Ridge Institute of Nuclear Studies will assure safe working conditions for all. The Department of Physics is very proud of its nuclear laboratory, and all interested persons are invited to visit with us."

Hello Young Lovers

Fourteen In State Band

Fourteen Austin Peay State College musicians have been selected for membership in the Tennessee Intercollegiate Band which performed February 24 at the fifth state convention of the Tennessee Music Educators Association.

Between 200 and 400 music teachers from all parts of the state attended the event at host college, Tennessee Polytechnic Institute, Cookeville.

Those attending from APSC included Sid Burton and Jim Wright, seniors; Dick Foust, Geney Wall, Douglas Ratson, and John Pickarell, juniors; George Foxworth, Norman Frederick, B.111

Murphy, Marty Brown, Jackie Kindig, and Nancy Villines, sophomores; and freshmen Mary Carolyn Cook and Byron Ball.

Low Bodine, Director of Bands, accompanied the group.

Dr. Aaron Schmidt, Will Hackman, and Dr. Tom Cowan also attended. Schmidt is the vice-chairman of the Southern Division of College Band Directors National Association. Bodine is chairman of College Band Directors National Association and Chairman of Intercollegiate Bands.

B.S.U.

Betty Ratcliff and Bob McGhee have been chosen by the Baptist Students of Tennessee and the Tennessee Baptist Convention to serve as members of the Baptist Student Mission program.

Betty, a junior at Austin Peay State, will serve this summer in a goodwill center in Florida. No salary is involved in this appointment. Betty holds the office of publicity chairman in the local B. S. U.

Bob, a senior at Austin Peay, has been granted a Baptist Student Union director's scholarship. Under the scholarship he will take graduate courses in theology and serve as B. S. U. director on a nearby campus. The state where he will be appointed has not been chosen as yet but possibly will be in Ohio or Minnesota. Bob is president of the local B. S. U.

Nine members of the B. S. U. attended a mission conference at Southern Seminary in Louisville, Ky., February 17-19. The conference was directed to those interested in mission work. Those attending were Betty Ratcliff, Linda Terrell, Carol Ann Tate, Francis Gillock, Ronnie Baylis, Billy Highsmith, Paul Dickens, Bob McGhee, and the B. S. U. director, Miss Patsy Middleton.

M.S.M.

The M.S.M. sponsored a World Wide Day of Prayer service in the Home Economics Department on February 17.

There it was made possible for any student who wished to leave the noisy halls and the day's problems and enter the calm serene atmosphere of a candle-light room and feel the closeness of God as he prayed.

For several years there have been discussions of the possibility of establishing a Wesleyan Foundation for Methodist students of Austin Peay State. Recently these discussions resulted in the realization of the need for such a group.

If a Wesleyan Foundation is formed, there is the possibility of the establishment of a permanent residence on or near the grounds of Austin Peay. There would be meetings there, arrangements for counsel by a full-time director, and recreational facilities for the members.

Another backwoodsman, admiring the wonders of a swank hotel lobby, was particularly intrigued by the elevators. He watched as a little old lady stepped into one and disappeared behind the sliding door. Seconds later, the elevator returned and out stepped a stunning redhead.

"Golly," he marveled. "I should have brought my wife after all."

Angry

Sign in old Pittsburgh hotel: "Notify us if you see a mouse in your room. We'll send up the cat."

Education Is Majic

By JAPHET NUSSBAUMER

The impression of many young people about education is one of a stored asset that is to be used in the advancement of their career.

In college they read and study the books necessary to pass an inconclusive test that can not possibly be a perfect gauge of their knowledge. They make good grades and are considered intelligent and ambitious by their friends.

This may be true, but often in conversation with them one finds a pitifully narrow frame of reference. Their minds have been molded into a neatly closed circuit that has killed or never developed an intellectual curiosity.

For education to be magic it must stimulate the intelligence, create a curiosity and develop a non-stifling humility that will encourage the seeking of knowledge. I believe we are improving on this point, but the development of a desirable awareness and curiosity has not been reached.

When Your Hair Has Turned To Silver

'Psychology Test' Conducted

Four co-eds were recently selected for a significant psychology test.

In order to obtain a cross section of various educational backgrounds, the girls were selected from four separate phases of college life: the Biology Department, the Home Economics Department, the Physics Department and the Education Department.

The first situation staged for their reaction was an automobile accident. The car was totally destroyed and the body of the young male driver was left by the road. The four reactions to this situation were:

Physics - "I'll bet if we examined the manner in which his car stuck the tree, and figured the weight of his body with the gross weight of the car over the distance it covered we could determine his velocity prior to the collision."

Education - "Somewhere this boy was let down. There has been a teacher in his life who was unable to communicate to the individual while instructing with group techniques. This boy was obviously not receptive to some past learning situation with which he was faced."

Biology - "I bet if we sat here and watched, we could see the various bacteria carrying out their processes."

Home Ec. - "Oh my, it's a man. What a waste."

In the second situation, each of the students was asked to give

their reaction to Shakespeare's Hamlet.

Biology - "I wonder whether the poison was organic or inorganic and what actual dosage would have been fatal!"

Education - "Somewhere in his early education, this boy was disappointed. It is obvious that while he was given a great deal of background in the arts and sciences, he never learned anything about himself. Someone did not educate the 'whole man'."

Physics - "I wonder if there was any sort of relativistic time-mass concept involved in the image of his father appearing and disappearing at will!"

Home Ec. - "Poor Ophelia. I wonder how she'll ever get that dress clean after floating in that muddy stream all day."

The third situation was also staged on the campus. The four subjects were seated in a room in the dorm near the phone. It is Thursday night and none of them have dates as yet for the weekend. The phone rings:

Biology - "You may call me a 'book-worm' if you want, but I certainly would welcome the opportunity of going out with some suitable male specimen Saturday night and conducting a lab in Restraint of Biological Urges."

Education - "I wonder if I was able to communicate on a rigid one-to-one plane with the young man who helped me with my books in the library yesterday."

Physics - "I sure would welcome the opportunity of experimenting with the thermal and chemical equilibrium of certain beverages in warm dark rooms this weekend."

Home Ec. - "Please Lord, let it be a man - and for me."

Reading Workshop Announced

The Austin Peay State College summer workshop in reading will be held June 7 to June 21, according to the Education Department.

Meetings will be held in the Clement Fine Arts Building.

Dr. A. Stiel Arley, Professor of Education and Director of the Child Study Clinic at the University of Missouri, Columbia, Mo., will be the guest speaker on June 9. Dr. Arley is well-known to classroom teachers as co-author of the Curriculum Foundation Series of Readers, author of books and articles on the subject of reading, and the 1960 President of the International Reading Association.

Reading consultants will be in charge of the daily sessions composed of lectures, discussions, demonstrations with groups of children, and organized group work of participants. Miss Catherine Beard of the Austin Peay English Department will serve as the workshop director.

Students enrolling for credit in the workshop must meet the regular requirements for admission to the undergraduate college or the Graduate Division. Students not seeking credit may be admitted as special students.

Three quarter hours of credit in education either on the graduate or undergraduate level may be earned by satisfactory completion of the workshop.

Registration for the workshop

may be accomplished during the regular summer school registration on June 7.

Summer school students enrolled at the college will pay the regular registration fee. Fees for those not enrolled for the summer school will be \$15 for undergraduates and \$18 for graduates. Those desiring to attend certain daily sessions may do so by paying a dollar a day.

Radio Club To Put New Antenna Up

The Austin Peay State College Amateur Radio Club is in the process of constructing a new and larger radio antenna in order to increase the current output of distance covered and consequently bettering communications.

There was some debate as to who would elevate the antenna after construction. Timothy Skinner, president of the club, said he would put it up in any type weather.

The "Ham" club was formed this year to increase understanding and mechanical operations in radio communications. There is no curriculum requirement for membership in this organization and anyone wishing to enter may speak to Timothy Skinner.

DRY CLEANING

LAUNDRY

keep a head of the game!

Gentlemen preferred by blondes, brunettes, and redheads prefer 'Vaseline' Hair Tonic. That's because most men use water with their hair tonic - and 'Vaseline' Hair Tonic is specially made to use with water! The 100% pure grooming oil in 'Vaseline' Hair Tonic replaces the oil that water removes from your hair. In the bottle and on your hair, the difference is clearly there! Just a little 'Vaseline' Hair Tonic does a lot!

it's clear & it's clean...it's

VASELINE HAIR TONIC

"VASELINE" IS A REGISTERED TRADEMARK OF LUSH CO. NEW YORK, N.Y.

O give thanks unto the Lord, for He is good: because His mercy endureth for ever.

—(Psalm 118:1)

Throughout all ages and all eternity, Almighty God seeks the soul of His children—seeking to fill our lives with the joy that comes from His good, His loving-kindness, His strength and His mercy. We create our own outer misery by wilfully turning away from Him.

Water Show To Be Held March 6-7

The Aqua Beaux prepare for their part in the annual water show, which will be presented March 6 and 7 at the college swimming pool. "Miss Aqua Belle" for 1961 will be announced at the show. (Staff Photo by Robert Evetts)

Theme music such as "Fascination", "Rainbow", and "Fantasy" will be used to feature the Aqua Beaux and Aqua Beaux in their annual water show March 6 and 7.

The event, under the direction of Miss Patsy Dykes, of the Austin Peay physical education department, will be held at the swimming pool of the Memorial Gymnasium.

It has a cast of 23 men, women and children. It will feature an all-male number, "March of Toys," and a children's routine, "Toy Tigers," by Emily Aaron and Stephanie Fisher.

Among the other numbers will be a clown act and a diving exhibition by male members of the group.

According to Perry Haymore, a member of the swimming group, "Nightmare" is one of the most unusual and entertaining numbers of the show.

The theme of the water show is "Dreamland," and it will be narrated by Dan Wink.

This is the third year that this group has been in existence and is one of the most outstanding in the physical education department.

This year's president of the Aqua Beaux is Diane Bieri, who has been with the group for three years.

Costumes, choreography, lighting and scenery is being done by Miss Dykes and members of the group.

The grand finale will feature the entire cast swimming to the music of the "Brahms Lullaby."

And let our people learn to apply themselves to good deeds, so as to help causes of urgent need, and not to be unfruitful. —Titus 3:14

It is a law of life that the self-centered destroy themselves with the poison of self-pity, fear, and anxiety, with hatred and resentment. Those with Christlike compassion for others enrich themselves with friendship, strong allies, and the consciousness that they are in partnership with God.

It Happened In MARCH

Fifteen Years Ago

Student Council adopted a new method of electing officers whereby the officers would be elected in the spring for the following year.

Registration for the spring quarter at APSC showed an increase over the previous quarter as the total enrollment reached 223.

Dr. D. H. Fite, associate dean and director of teacher training, resigned his position to become associated with the Tennessee Valley Authority as a chief education officer.

Ten Years Ago

George W. Boswell, assistant professor of English, presented a paper on British Folk Ballads at the Forty-fifth annual meeting of the Tennessee Philological Association meeting at Cumberland University.

A \$300,000 appropriation was granted Austin Peay State by the Tennessee State Legislature. The money was appropriated for the completion of Memorial Gymnasium and Main Hall (now Ellington Hall).

Five Years Ago

Austin Peay State's annual Career Day, sponsored jointly by the college and Clarksville's Rotary Club, attracts 1200 high school juniors and seniors.

The Graduate Council of APSC approved graduate minors in the fields of Business Education, Health and Physical Education, and Industrial Education.

Coach Leon Sandifer welcomed seven returning lettermen for the 1956 baseball season. These included Buddy Martin, Al McClellan, Lloyd Carlew, Sam Coley, Phillip Brown, John Hendek, and Tom Morgan.

One Year Ago

Dr. Leon Bibb, professor of Industrial Arts, attended the President's Conference on Occupational Safety in Washington, D. C. Gamma Theta Upsilon, honorary fraternity in geography, initiates sixteen charter members. Austin Peay State's Gory cop first game in NCAA South Central Regionals with a 74-63 win over highly-touted Belmont Abbey. Coach Dave Aaron's club fell the following night to Kentucky Wesleyan by an 83-68 count, thus ending the season with a 22-5 record.

New Version of Alma Mater Is Rehearsed

The first experimental rehearsal of "A Song for Austin Peay" was performed by the student body in assembly February 14 under the direction of Dr. Tom Cowan and Jack Hurt.

The new song was written by Dr. Charles Gary, former chairman of the Music Department of Austin Peay, to become the new "Alma Mater."

The original text is as follows:

A song for Austin Peay,
A pledge of loyalty,
A vow to make her name revered
With the best in Tennessee.

Sing of her youthful spirit
That crowns a century
Of those who lived
And learn'd to love her campus
as do we.

Down to eternity. (new version:

Pledging our heart to thee.)
A song for your Alma Mater,
Sing for Austin Peay!

A very small change has been made to the original text as compared with the one presented in the Students' Handbook.

Dr. Gary ceased his Austin Peay position in 1958 when he was offered a job as secretary of MENC in Washington. He composed several other songs that the Student Council has presented in the Student Handbook: two of them are: "Go, Governors, Go" and "Smash Bang."

The new song, "A Song for Austin Peay," is a possible prospect to replace the old Alma Mater. However, it is still under experimental testing.

Home Ec Week Observed Here

Tennessee Home Economics Week celebration began at Austin Peay State February 23, with home economics students in the home management course entertaining their parents and members of the college administration.

Students in the class are Nancy Ann Byard, Angila Bell, Janice Petty, Marilyn Cowan, Kay Crose, Diana Weakly, Gregory Bell, six-month-old son of Angila and Bobby Bell of Oak Grove, Ky. is the infant in this year's class.

Mayhew Speaks Today About Getting Ready For Marriage

Home economics students at Austin Peay State sponsor the speaker in today's assembly.

The Reverend T. W. Mayhew, pastor of Madison Street Metho-

dist Church, was scheduled to speak on "Getting Ready for Marriage."

The most important preparation for adequate living, the Rev. Mayhew was to bring out, is preparation for marriage. Research statistics on family studies reveal that only one marriage involving a home economics graduate in 173 marriages ends in divorce.

The application of science and economics in the home is the goal of the home economics students.

In this automatic age, machines have rapidly changed the ways of living, and people are faced with decisions in their personal lives which require much preparation.

Schmidt Is Guest Clinician

Dr. Aaron Schmidt, of the Austin Peay State College music faculty, was guest band director and clarinet clinician February 17 and 18 at the Delta State College band clinic in Cleveland, Miss.

Dr. Schmidt was the guest director of two All-Star district bands composed of outstanding high school musicians. He presented a clarinet lecture-demonstration to high school band directors and students.

Dr. Schmidt's work with the Mississippi clinic was comparable with that of Bob Lowry at the recent clinic at Austin Peay State College during the snow period.

Moustafa Speaks

Fouad Moustafa, an Austin Peay student from Iraq, spoke to the Gamma Alpha chapter of the Gamma Theta Upsilon about his native country on February 9.

He answered questions. Afterwards a social hour followed with refreshments provided by Mr. and Mrs. Charles Gardner. Harry Law proposed that individual members should each prepare a program to present to the club.

My Neighbors

"Is there somebody more my size I can complain to?"

Ready For Fashion Show Sponsored By Home Ec'sers

Jerry Poole, Circle "K" president from Greenbrier, and Marilyn Cowan get into the practice of modeling for the Co-Ed Fashion Show, to be held March 23 by the Home Economics Club.

The theme of the show is "Round the Clock Fashions at A.P.S.C." A waking-up scene in the girls' dorm, classroom scene, and coke party are typical phases of college life which will be displayed in the show. The latest spring fashions in sports, casual, dress, and formal attire, both men's and women's, will be modeled. Along with these spring fashions will be one of the 1961 "Hair Styles." Valuable door prizes will be given away and refreshments will be served at intermission.

All students are invited to make plans now to attend "Round the Clock Fashions at A.P.S.C." March 23, Clement Auditorium, 7:30 p.m. Admission, 50c.

(Staff Photo by Robert Evetts)
