ADDITIONAL INFORMATION

- Numbers for 1/26/2022 reported as of 1/22/2022. Over the last 7 days there were 12 deaths reported. Hospitalization numbers are not being tracked at all. We are at an all-time high in both positive tests and in % positive tests. Again, this is reported cases only this does not count positive cases that are done using home kits that are not reported to physicians. Cases are continuing to grow. For those that develop mild symptoms they will be ok but we do not know the long-term effects of COVID and this still is very dangerous to those not as lucky to get mild cases, the elderly, or for students or employees with risk factors for serious disease.
