AUSTIN PEAY STATE COLLEGE, CLARKSVILLE, TENNESSEE

FEBRUARY 4, 1964

Caroline Liscoe Chosen Best Dressed

Susan Price, Trudy Brotherton Selected As Alternates

Miss Caroline Liscoe, a freshman home economics major from Clarksville, was chosen the 1964 Best Dressed Girl at Austin Peay State College last Wednesday night in the preliminary Best Dressed Contest.

The fourth annual contest was sponsored by The All State, the campus weekly newspaper.

Miss Susan Price, junior English and biology major from Wilmington, N.C., was first runner-up and Mrs. Trudy Rice Brotherton, junior English major from Clarksville, was second runner-up.

The ten finalists modeled three outfits for the judges in this order: an on-campus outfit, a daytime off-campus outfit (church) and a cocktail dress.

Caroline's on-campus outfit was a gold long-sleeve sweater with white basket weave trim around the neck and bottom and a matching gold pleated skirt with a large gold safety pin at the opening.

For her daytime off-campus outfit she wore a black and white tweed suit with a black knit turtle-neck shell. Her accessories included a black Garbo Slouch

hat trimmed with grosgrain ribbon, black leather elbow length gloves and black leather medium heel pumps with matching leather purse.

Caroline's third outfit was a floor length cocktail dress featuring an empire waistline and made of metallic brocade. The slim skirt of two lengths joined the bodice at a bow. Her outfit was completed with long white gloves with pearl buttons at the wrist and white opera pumps trimmed with silver.

Bouquets were presented to the winners by Mrs. Joyce Keatts Pickering, the 1962 Best Dressed Girl at APSC. In addition Caroline received a trophy and gift certificates from ladies' shops in Clarksville.

Pat Allison was master of ceremonies for the evening. The program included piano music by

APSC To Get \$8,560 Grant

In Science Work

The National Science Foundation has announced a grant of \$8,560 to Austin Peay State College for renewal of their Cooperative College School Science Program for the academic year 1964-65. The program is under the direction of Dr. William G. Stokes, head of the APSC mathematics department.

The grant to APSC provides financial support for participation by 24 secondary school students and eight secondary school teachers. Two courses, Introduction to Mathematical Structures and Functional Trigonometry, will be scheduled for 16 weeks each, beginning Sept. 19, 1964. Those interested in participating in the program may contact Dr. Stokes for further information.

The objectives of the program are (1) to assist the cooperating secondary schools in planning and implementing the improvement of their current offerings in mathematics; (2) to provide an appropriate setting for selected secondary school teacher participants to learn the sub-

(Continued on Page 3, Col. 1)

Stokes Attends Math Meeting

Dr. William G. Stokes, head of the mathematics department, attended the meeting of directors of CCSS Programs in Washington, D.C., last week.

Stokes also attended the annual joint meeting of the Mathematical Society in Miami, Fla., prior to the Washington meeting.

Change In Vending Machines Due To Take Place

Tom K. Savage, dean of students, announces that all vending machines dispensing soft drinks in bottles will be removed from the campus by February 14. New cup-type vendors will replace the bottle dispensers. They will use 10-ounce cups in which eight and three-fourths ounces of drink will be dispensed. This amount compares favorably with the 10-ounce bottle.

This change has been considered by the College for several years, but until now the volume of business did not justify the distributors' use of this more expensive type vendor.

The increased sale of drinks has magnified the problems arising from the use of bottles. During the past calendar year, more than 30,000 bottles were not returned to the distributors.

These were lost, broken or stolen. The loss of profit from unreturned bottles amounted to ap-

proximately \$1,000 for the past semester. In addition, broken bottles have created hazards in the dormitories and on the campus. These economic and safety factors make the change necessary.

No appreciable loss in service is anticipated since each distributor presently holding a permit has been authorized to install the new cup-type vendors. Three of the four distributors have already indicated they are ready for the change.

Dean Savage feels that this early announcement is in keeping with the policy of the College to keep the students informed about planned changes in services, and that it will furnish a reasonable basis for understanding the change being made.

Faculty Members On Review Board

Four members of the Austin Peay State College faculty have been named to the reviewing board of a new journal devoted entirely to book reviewing for the college library, according to Miss Johnnie Givens, librarian at APSC.

The four are Dr. James Sims, head, Department of English; Dr. Thomas Cowan, head, Department of Music; Melburn Mayfield, head, Department of Physics; and Floyd Brown, who is currently on leave from the Department of Biology.

The group will serve as book reviewers in their various subject fields. The Journal, *Chelon*, is being sponsored as a special

(Continued on Page 3, Col. 2)

Coed Of Week

THIS PRETTY YOUNG LADY is Miss Jan Welker, coed of the week. The blue-eyed blond stands 5-5 and measures 36-25-36. She is a junior from Clarksville majoring in biology and minoring in chemistry and plans to further her education in the field of medical technology upon graduation. Jan is a cheerleader and a member of the Tri-Beta and Epsilon Club. Her hobbies include dancing, tennis and water skiing. (The coed is chosen each week by The All State staff.) (Staff Photo by Billy Hutton)

Appreciation

Appreciation is a word which we all know the meaning of but seldom take the time to use. Webster's dictionary defines appreciation as "The action of appreciating. A favorable critical estimate."

We very often take great pains to express our displeasure over those things which are displeasing to us. We express our unhappiness in many ways and rather openly at times. This is a part of our American heritage -- the freedom to express our thoughts openly when we feel that they should be expressed.

However, after we have made known those things which are displeasing to us, we often forget about the situation and let the matter drop. Even after changes have been made we fail to do the one thing which would take very little effort. We fail to express our feelings of thanks after improvements have been made.

To say "Thank you" requires no effort at all and very little energy. But, how many of us remember to use these two words when we should use them most?

There have been several instances on the campus of the College this school year which have been displeasing to the students and to the faculty. The feelings of the various individuals have been expressed openly and results have been seen as a consequence.

But, does anyone who registers complaints against those things which they disagree with follow up their complaints with an expression of thanks for the problems being solved. Very few take the time to say thanks.

Letters to the editor have been published in The All State concerning different grievances. The proper authorities have taken these grievances under consideration and, in most cases, have remedied the situation. Yet, not one word of thanks has been received by The All State thanking those responsible for clearing up the situation and making matters a little more enjoyable for the students and faculty. If only those who complain would voice their thanks as harshly as they voice their complaints!

Why just celebrate Thanksgiving once a year? Why not every chance you have? After all, to say "Thank you" requires so little effort.

THE ALL STATE

The All State is the official newspaper of the Austin Peay State College. It is published every Tuesday during the academic year, except for examination periods and holidays, under the general management of Sherwin Clift, Director of Public Information.

Students Want More Tests

By Judy Trotter and Sammy McIntosh

Tests, tests, tests. The college student is constantly besieged with tests of every description. Essay tests. Short-answer tests. Identification tests. Multiple-choice tests.

They all add up to the same thing—a constant migraine headache.

The students were polled this week on whether or not mid-term tests should be replaced with weekly or chapter tests. Sandra Williams, freshman history, Clarksville: "Yes, they should. It is easier to study as you go along than it is to study all the material for one test."

Jim Felham, sophomore, undecided, Hopkinsville, Ky.: "No! I have enough trouble as it is now."

Mrs. Nancy Dunn, sophomore English, Clarksville: "Basically I think that tests should be given as the instructor wishes. However, tests should be given more frequently and the mid-term eliminated. Finals should be given but they shouldn't count so much."

Bill Wooley, sophomore, marketing, Hopkinsville, Ky.: "No. In fact, I think that we should have more tests than we have now."

"As it is now, if you foul up on one test, it ruins your chances of passing. The more tests you have, the better chance you have."

Sharon Evans, senior, home economics, Fort Campbell, Ky.: "I think that this would depend upon the course being taught. In classes which use a textbook very much, frequent tests are advisable. In classes which are based on lab work, mid-terms are fine."

"However, there is the possibility that the students would get in a rut by having weekly

tests. In addition, it would be an extra burden on the professor. "In an overall view, weekly and chapter tests would not replace the mid-term."

Sherrie Jones, freshman, biology-chemistry, Clarksville: "I think weekly tests would be better than mid-term exams because they would give students more opportunities to have a better average. Some teachers only give one or two tests per course and we don't have a chance if we fall those."

Conde Peals, freshman, French, Tellico Plains: "I think weekly tests would be much better because it's easier to pass small tests than it is to pass large ones like mid-terms and finals."

Linda Yarbrough, freshman, health and P.E., Clarksville: "I think weekly tests would be much easier on the teachers and the students both. By having weekly tests, students may have to study more but it wouldn't be like having to cram for a mid-term."

Wallace Armstrong, freshman, pre-med, Clarksville: "I think weekly or chapter tests would be better. There is too much material covered by the mid-term. It is very hard for most people to retain so much information at one time."

Playhouse Crew

Is Enchanted

The crew of "The Enchanted" is becoming quite "spirited."

Two sets are called for in the play—a forest for the first two acts and a young girl's room for the third. Special lighting effects are being rigged to be used in heightening the mystic atmosphere surrounding the ghost.

Props being gathered for the play include a hearing trumpet, cough drops, guns, pitch pipes, corkscrews, a rubber band and similar paraphernalia.

Sound effects range from the blare of a military band to cricket chirps.

Tailors are busy sewing little girls' pinafores and military uniforms.

The results of all this activity will be evident on February 12, 13 and 14 when the A.P. Playhouse will present its winter production, "The Enchanted."

General admission will be \$1 for adults and 50 cents for students.

Klub Korner

Gamma Theta Upsilon meets tonight at 7 in McCord HOS. Sandra Rawls will show slides of her visit to India.

All students who are interested in geography are invited to attend.

— □ □ □ —

The Interlingua Club will meet today at noon in the cafeteria. A membership roll will be taken.

— □ □ □ —

The Kolonia Klub meets Thursday at 6:00 p.m. in the Student Center. This week we are beginning a series of films on personal work. These films will be interesting as well as beneficial. Every one is invited to attend and bring someone with them.

It Happened In FEBRUARY

Seventeen Initiated Into Society

Eight active and nine associate members were initiated into Del Square Psi, honorary physics society, Wednesday evening at the annual initiation banquet held at the Riverview Restaurant.

The active members included James Combs, Ronnie Ezell, Carlton Platt, Dudley Miller,

Ronald Miller, Johnny Sleight, Shirley Summers and Robert Wendell. Associated members inducted were Larry Bryd, Jimmy Daise, Ronald Capton, Glee Ann Long, Larry McCulloch, Robert Morris, William Peacher, Joseph Renshaw and James Roe.

Guests at the banquet were W. Bert Thomas and James L. Major, who were presented with honorary memberships.

Recipients of the Lois Anne Cooper Award and the Physics-English Award were also announced. Jerry Welch, Capton, Dixon, Sleight and Miss Summers received Cooper awards for either having the highest final average in Physics 201 or making the highest mark on the final exam. Ronald Miller and Sleight were honored with the Physics-English Award, which is awarded quarterly to the physics major who makes an 'A' in English.

stance of improved course materials and to apply the newly learned principles in a teaching capacity; (3) to further develop cooperation between college and high schools in increasing the quality of education in mathematics; and (4) to help identify high ability students who have excellent potential for becoming scientists and to accelerate their scholarly development in science and mathematics through providing advanced and intensive courses taught and directed by college level scientists.

Review Board

(Continued from Page 1)

project by the Association of College and Research Libraries, a division of the American Library Association.

Dr. Cowan will have a review of "The Craft of Magic Teaching in the Elementary School," by Inez Schubert and Lucille Wood in the Winter 1963 issue, the first issue of the quarterly journal. Dr. Sims is presently working on a review of George Sensabaugh's "Review of Milton in Early America" for a later issue of Choice.

The increase in the number of titles published each year makes difficult the problem of book selection for a college library. The publication of such a journal as Choice is being originated in an attempt to advise faculty and librarians in the selection of the most valuable titles. The editorial staff has chosen from selected colleges throughout the United States faculty in liberal arts who have been doing book selection of high quality college libraries. These reviewers will serve on the board as subject specialists reviewers.

HOME ECONOMICS DEPARTMENT - Members of the home economics department at Austin Peay State College are (l to r) Miss Dora Dean DePriest, Mrs. Lillian Bradley and Mrs. Doris Milton, department head. (Staff Photo by Don Reese)

By Jan Lettwich

Question: What has a baby on can, dishes to wash and skills to apply to her work?

Answer: A home economics major living in the Home Management House.

The home economics department offers its students a chance to apply the knowledge they gain in science courses, art classes and economics. Experience is the best teacher, and the home economics girls are students of experience when they graduate.

For one quarter juniors and seniors live, work, eat and learn in an atmosphere similar to that of an established home. Even a baby is in residence during the day. The first home management baby was Dean Tom Savage's daughter, now a student. Each year some faculty member or married student has loaned a child to the department while its parents work or study.

Three women are members of the department. Mrs. Doris Milton, head of the home economics department and associate professor, received her masters degree from the University of Tennessee. She did undergraduate work at the University of Arkansas and has attended Iowa State University, Oregon State University and Texas Women's University. Lillian Hammett Bradley, instructor in home economics, received her masters from UT in child development. She is closely in-

voled with another of the unique establishments in the department—the nursery school. Dora Dean DePriest, assistant professor of home economics, earned her M.A. degree from Peabody in food and nutrition. She has done additional work in Iowa State University, University of Tennessee and Cornell University. Her undergraduate work was done at Middle Tennessee State College.

"A woman graduate works about 25 years in employment. Part of that work time may come before she starts a family, and part of it after the children are in school," Mrs. Milton quotes from the U.S. Department of Labor, Women's Division. The department prepares its girls to combine a career and a home. "Homemaking experience helps in a career, and a career keeps you up to date in homemaking." Home Economics graduates are wanted in the teaching profession; they are employed in business; they are important in the community organizations and state and national agencies. But the requirements for these opportunities are stiff. The department requires concentrated study in science, economics, art and human relations. Personal requirements are high—in interest in the welfare of people, good judgement, a sense of what is

important in life, intelligence, pleasure in learning and the ability to work well with others. Those hours and hours of science courses require patience and determination, some of the girls add.

It is difficult for Mrs. Milton to discuss her favorite topic—home economics—without talking about the girls. "They are what makes it so wonderful. You know these are the women who will be leaders in the schools—teaching, P. T. A., supervisory work. They are the ones who will manage the church dinners and family picnics. Some of them will be in advertising and demonstration work on TV and radio. All of them will be happy doing what they love best, helping others in the community and establishing wonderful homes. A nation is only as strong as its family units."

Mrs. Milton's words summarize the department's reason for enthusiasm.

The Best Sports Coverage In The OVC

Page 4—The All State, Tuesday, February 4, 1964

Tony's Tidbits

By Tony Boehms

Govs Invade Western

Tomorrow the Governors will travel to Bowling Green, Ky., to invade the E. A. Diddle Arena on the campus of Western Kentucky State College.

This will be the first contest between APSC and Western since 1942 when the Hilltoppers beat the Govs twice by scores of 42-34 and 46-34 for the only recorded varsity scores between the two schools.

The Governors and the Hilltoppers have been swapping the bottom spot in the OVC and this game could well decide the lower position in the league standing.

The Govs will travel to Martin, Tenn., on Monday for a non-conference squabble with UTMB, who also has a new gymnasium. APSC won the first meeting between the two schools early in the season by a score of 89-65 on the Governors' home court.

Study Hall Meets

Have you noticed a few extra patrons in the library who weren't normally there last quarter?

This privilege granted an elite group of the football team is a new plan put into effect by the coaching staff to keep the men in school.

Each of these men of the select group is given the privilege of attending a two hour session in the library from 6:30 to 8:30 three nights of the week.

The purpose of this out-of-season work session has been revealed but the qualifications for a participant in this experiment should also be mentioned. To qualify as a member of this group, an F or two D's (or more of the same) must have been earned during the Fall Quarter by the athlete.

From this we can see that the Governor coaching staff is planning to have a majority of their football players back this fall when the 1964 season begins.

Frosh Face Busy Week

This week should be the Governor freshman team's major test of endurance. Following last night's encounter with the Tech frosh, they will travel to Western Kentucky Wednesday, to Cumberland College Thursday and to Vanderbilt Saturday. Each should be quite a contest and the Gov yearlings could surprise these highly-rated frosh opponents.

The Last Word

--Five members of the Gov track squad will compete in the 1964 Southeastern United States track and field championships in Chattanooga Saturday night. Danny Gibson, Tom Hinkle, Jim Hatchett, Jim Lamberson and Bob Embry are the entries from APSC who will be in competition with athletes from many of the colleges of the southeast.

--Although there is no specific school record for consecutive free throws that continues or carries over from one game to the next, Doug Stamper has surely set a personal record for most charity tosses in succession. Stamper has a total of 18 free throws in a row which were recorded, with two at Tennessee Tech, nine against Murray State and seven against East Tennessee.

ETSU Halts Governors 76-66

REFLECTION OF ANXIOUS MOMENTS - Joyce Davenport, of the 1963-64 cheerleaders, reflects the feelings of many as she nervously watches action during one of APSC's basketball games. The basketball record, not including Monday night's game, is 8-8, which has caused anxiety for some people. (Staff Photo by Billy Hutton)

Cager Of Week APSC Number 19 Rebounding Team In Nation

STAMPER

Doug Stamper, 6-2, senior guard from Hamilton, Ohio, is this week's choice for cager of the week.

Stamper has been the leading scorer for APSC all season and now has a 19.8 average for 14 games.

In last Wednesday's loss to East Tennessee Stamper scored 19 points on six field goals and seven out of seven free throws.

Stamper has now hit 18 consecutive free throws in the Govs' last three games and is among the leaders of the OVC with a percentage of 82.6.

The latest National Collegiate Athletic Association statistics show that Austin Peay State College is one of the top 20 rebounding teams in the nation.

The statistics, figured on a percentage basis, show that APSC has recovered .550 per cent of the rebounds in all of their games through January 25.

Stamper Leads Govs With 19

The Austin Peay State College Governors flew into Johnson City, Tenn., last Wednesday, January 29, to play the East Tennessee State University Buccaneers.

The Govs were out for revenge as a result of an earlier loss at the hands of the Bucs by the score of 97-69. However, revenge was not theirs. The Bucs managed to pull off a 10 point victory, 76-66.

APSC trailed ETSU 36-33 at the half and stayed close during the early stages of the second half. The foul shooting of the Governors was one of the things which kept them in the game as they hit 18 of 25 for the night.

The defeat left the George Fisher coached club with a 2-6 conference record and an 8-8 overall mark. "We played average ball. It wasn't one of our best games, but it wasn't our worst," said Fisher. "We had four boys in the double figures, but couldn't stop that Frazier (Houston)."

Frazier pumped in 12 field goals and added two free throws for 26 points. Cliff Gibson had 19 and Willie Malone clipped in with 15.

Doug Stamper, the OVC's No. 5 scorer, paced Austin Peay State with 19 points. Steve Miller (12), Henry Murray (11) and Jim DeForest (10), rounded out the Gov's top scorers.

Stamper also hit seven of seven foul shots to push his total to 95 of 115, a sizzling 82.6 per cent, second best in the league.
