

# State board approves faculty changes

## Pryor named head of Columbia State

Will assume  
new duties  
on Monday

Dr. Harold S. Pryor, professor of education and director of teacher education, was named president of Columbia State College, Columbia, Tenn., Friday by the state board of education.

A native of Livingston, Tenn., Pryor, 47, will begin his duties at Columbia State on Monday.

Dr. Pryor, who has been at APSU since 1951 also served as chairman of the department of education, psychology and library science.

The World War II veteran holds the B. S. degree from APSU, the M. A. from Peabody College and a doctorate in school administration from the University of Tennessee. He is married to the former LaRue Vaughn of Henry County.

Pryor replaces Dr. James W. (Continued on Page 4, Col. 1)

## Math lecture series slated to start today

A two-day series of lectures on mathematics is being brought to APSU today and tomorrow by Dr. Merlin M. Omer, of the department of mathematics, Nicholls State College, Thibodaux, La. Omer is appearing through the Visiting Lecturers Program, sponsored by the Mathematical Association of America.

He will speak at 7 p.m. today in the lecture room of the Clayton Building. His topic for discussion will be "The New Mathematics—What It's All About."

Tomorrow he will speak in the audio-visual room of the McCord Building at 11 a.m. on "Some Unresolved Problems in Mathematics."

Dr. Omer will also speak to individual classes and is available to students and mathematics staff for discussions in regard to mathematical topics of mutual interest.

The Visiting Lecturers Program, through which he is speaking, has four general aims: 1) strengthen and stimulate the mathematics program of colleges.

2) To provide the mathematics staff and major students with an opportunity for personal contact with productive and creative mathematicians.

3) To aid in the motivation of able students to consider careers in mathematics and the teaching of mathematics.

4) To create and strengthen ties between undergraduate colleges and graduate schools.

## Of flatorial districts

### Probe reveals inadequacies

POLITICAL SCIENCE—APSU faculty research projects made possible by Tower Club contributions include one conducted by Dr. Edwin L. Cobb, department chairman and associate professor of political science. The girls Friday, Carol Smith, left, and Janice Herndon, did the "leg work" for the project which sought to evaluate the effectiveness of Tennessee's flatorial districts. The findings: ineffective.

## Precious Few scheduled for Feb. 23 performance

The Precious Few, a recording group out of Huntsville, Ala., will put in an appearance at APSU, Friday, Feb. 23, for a dance in the University Center. The group records on the Vee-Jay-Tone label and is headed by one of the country's top booking agencies.

Alpha Kappa Psi is sponsoring the dance, and fraternity president Jimmy Crowell says, "We

Photo on Page 3

are bringing this group here in an effort to improve the social atmosphere on the campus.

"Alpha Kappa Psi also has plans in the works for more dances, with an early spring appearance of the Lemonade Charade a possibility," he said.

Admission to the Precious Few dance will be \$2 per couple, with stag tickets also on sale.

Tickets are now being sold in the University Center.

Editor's Note: This is the first in a series of reports concerning faculty research projects currently being conducted by Austin Peay State University faculty members. These particular research endeavors are being sponsored, either totally or in part by funds contributed to the university by the Tower Club of Clarksville.

by TERRY MAYER

The inadequacy of Tennessee's flatorial districts has been pointed out in a research project recently completed by the chairman of APSU's political science department.

Dr. Edwin L. Cobb, department chairman and associate professor of political science, and two student assistants conducted the research project by canvassing state legislators who are currently or have ever represented a flatorial district.

"The use of the term flatorial district here," Cobb said, "implies one of two types."

"Either a multi-county district in which one or more of the counties has one or more direct representatives in addition to the one shared with another county."

"Or a multi-county district in which none of the counties has direct representatives but the single representative is rotated among the counties by party or other informal agreement."

The districts are also known as "flators" because of the nature of the representation. Lengthy questionnaires were sent to persons who have served as representatives from flatorial districts in the past 12 years.

Twenty-nine per cent of the 282 questionnaires were completed and returned. Seventy-five per cent of those questioned advocated the abolition of the flatorial system.

The present system of representation enables the county with a most population to dominate an election.

A tremendous drawback of the rotation of representatives from

(Continued on Page 3, Col. 2)

## Woodward, Ellis, Gentry are affected

Three personnel changes at Austin Peay State University were approved Friday by the state board of education.

The changes were:

•Dr. William H. Ellis from director of graduate studies and associate dean of faculty to dean of faculties, effective July 1.

•F.G. Woodward from dean of faculty to assistant to the president, effective July 1.

•Glen S. Gentry from chairman of the department of business and economics to acting director of the school of business and economics, effective Sept. 1.

Dr. Ellis will become administrative head of both the college of arts and sciences and the division of applied arts and sciences under the university reorganizational plan.

Woodward will retire from his present position as dean of faculty on June 30 to comply with state board of education regulations.

The board approved APSU's request to administer the school's academic program through a college of arts and sciences, a college of education, a school of business and economics, a graduate school and a division of applied arts and sciences.

In other state board action, APSU gained approval to borrow funds through the Tennessee Bond Authority to construct a men's dormitory and 32 apartments for married housing. Total cost of the project will not exceed \$1,065,000.

ELLIS

## Annual jazz festival planned

APSU's answer to the "big band sound" in the Jazz Idiom will be presented in concert form Feb. 23, at 7:30 p.m. in the Clement Pine Arts Auditorium.

The annual concert, entitled the Mid-South Jazz Festival, is the brainchild of the university's chapter of Phi Mu Alpha Sinfonia — a national music fraternity.

"If attendance is any indication," said Dr. Aaron Schmidt, professor of music and director

of bands, "I can safely say this is by far the most successful project the music department undertakes."

Although less popular now with the public than in the 1950's and '60's, the big jazz sound has been picked up by the nation's college and university bands.

"The actual program hasn't been firming up yet," Schmidt continued, "but we are expecting anywhere from five to eight

bands to participate."

Among those expected are the Tactical Air Force Band, the Tennessee Technological University Band and the Phi Mu Alpha Collegians.

"The expression and experience gained by this annual concert are invaluable to the serious-minded musician. In fact," added Schmidt, "this is actually a training ground for our students."

## Tom Warren

## The Warren Report

For more than two months, a constitutional committee of the Associated Student Body has been striving to better organize student government. They have worked for all APSU students in an effort to give the students a stronger voice.

Yet, the students that the committee represents couldn't care less! Statistics of campus-wide elections over the last several years show that less than 25 per cent of all registered students vote.

Why is this present? The various issues that are voted on are not intended for or affecting only one-fourth of the student body.

### Apathetic Voters

The low figures of eligible voters is the result of apathy, despite THE ALL STATE'S approval. Students are constantly saying, "The ASB is a farce, there is no true student government on campus and my vote wouldn't make an ounce of difference."

Many of those same students complain for more activities and

entertainment, better parking facilities, more liberalism and much more that there is no room to list. They ask when will action be taken.

The answer will come when each of them cares enough to take about five minutes and vote in elections and referendums. It is the student's fault that bad officers and representatives are elected.

During the spring quarter, students will vote on a new constitution for the Associated Student Body. It is a campus-wide referendum. This election will determine just how much voice students will have next year and for several years to come.

Before the election, students—all students—will be asked to attend a meeting where the proposed changes will be explained.

Every student owes it to himself to attend this meeting and then participate in the election.

Now is the time for students to stop crying and complaining. Now is the time to grow up.

### Probe reveals

(Continued from Page 1)

one county to another is the destruction of legislative seniority. "When an agreement is made to alternately elect a person from each county in a multi-county district," Cobb emphasized, "no person has an opportunity to be in the legislature long enough to be an effective representative."

"It's up to the Supreme Court to decide if the federal system is constitutional," Cobb added, "and it's just a matter of time until some ruling on the issue comes down for all states."

Texas' federal system has already been ruled unconstitutional.

The paper work involved in compiling the data for a research project like this is quite an undertaking.

"My two girls Friday, Janice Herndon and Carol Smith, were invaluable to me. They did tremendous jobs in acquiring data on the representatives we sent questionnaires to."

"They also did the research from the Tennessee Blue Book to compile information about the educational and occupational backgrounds of the representatives."

## At Valentine dance

# Cupid seemed to have a busy night

by BARBARA MCINTYRE

Cupid really seemed busy at Friday night's Valentine Dance in making it one of the most successful and best dances here at APSU.

Almost 300 couples were present to see Dick Littleton and Jeanne Evans crowned as king and queen of hearts.

Dick, a candidate of Alpha Beta Chi sorority, is an English major from Erin, and Jeanne, a candidate from Theta Phi Epsilon sorority, as well as their third consecutive queen, is a psychology and history major from Clarksville.

The court was composed of Carol Allen and Joe Wallace, Delta Zeta Tau; Caroline McMahon and Howell Flatt, Sigma Tau Omega; Bob Morris, Theta Phi Epsilon; and Jean Collins, Alpha Beta Chi.

The junior court included Susie Perry and Bob Young, Delta Zeta Tau; Janice Shelley and B. Brown, Ledbetter, Sigma Tau Omega; and Sheila Martin and Tim Arrington, Theta Phi Epsilon.

The well-attended affair seemed quite different from last year's dance held at the National Guard Armory. When students were asked about the difference the new University Center made, the comments were varied.

Don Layton, "It's a 100 per cent improvement."

Sherry Stevenson, "The atmosphere makes all the difference in the world, and the band's great."

Don Jones, "It's nice to be able to relax in the lounge or snack bar during the band's breaks or whenever you want."

Everyone seemed to enjoy themselves and have a good time. Various comments were:

Andy Toombs, "I'm having a great time, the band is good, and even the decorations are nice."

Romona Sprilock, "The band has a lot of showmanship."

Tim Arrington, "The band is

great, but they don't play enough slow ones."

Even Hugh Akerman, one of the chaperones, claimed he was having a ball. Dean TomK, Savane, on the other hand, was a little

disappointed at not hearing a waltz for when a band member told him not to hesitate to ask them to play anything, he replied, "I bet you can't play a waltz."

VALENTINE ROYALTY — Dick Littleton and Jeanne Evans were selected to reign as king and queen of hearts at Friday's Valentine dance. Jeanne was the candidate from Theta Phi Epsilon sorority, while Dick was Alpha Beta Chi's candidate.

## Monetary policy to be discussed

Members of the economics and business departments will attend a Monetary Policy Seminar at the Nashville Branch of the Federal Reserve Bank of Atlanta, Feb. 23.

The research staff of the Federal Reserve Bank of Atlanta will discuss the current domestic, economic and financial situation.

Harry Brandt, vice-president of the research staff, will give a discussion of some of the practical problems that arose in the execution of policy during 1966 and 1967 and some of the problems currently faced.

The group will be brought up to date in the U. S. balance of payments position, international structure of interest rates and the gold flow.

Those attending the seminar from APSU are Aaron A. Hutcheson, D. R. Frazier, Lawrence Baggett, Thomas Bear and Glenn Gentry.

## Youngest of the new young breed emphasizes role of librarianship

In an address to some 45 members of APSU's chapter of Alpha Beta Alpha and area librarians, the director of one of the nation's finest graduate library schools emphasized the role of librarianship in today's society.

Described as one of the new "young breed" of directors, Dr. Edwin S. Gleeves, of Peabody Library School in Nashville, was introduced as the youngest.

"Books," Gleeves began, "exhibit progress in the world more than anything else."

"Because we can reduce everything we say to an alphabet of 26 symbols, we are able to rely on the written word for much of the knowledge we have acquired."

In emphasizing the role of the librarian and the library, Gleeves continued, "It is our heritage to add the public in obtaining the knowledge from these printed symbols."

"We literally hold the key to the storehouse where mankind obtains the knowledge which keeps him free."

Dr. Gleeves holds a master of arts degree in library science and a doctorate in English from

Emory University in Atlanta.

Director of the David Lipscomb Library in Nashville, Gleeves was a visiting professor at Peabody and joined the English faculty there in 1966.

He has been director of the graduate library school since August of 1967.

All librarians obligation to his patrons?

"The person planning a career in librarianship owes it to the people we will service to obtain as broad an education as he possibly can."

"Even on our faculty," Gleeves continued, "we prefer the per-

son who has branched out to include a diverse liberal arts background. Almost every faculty member in the graduate library school at Peabody has a master's degree in at least one field other than library science."

A graduate library school's obligation to the future librarian?

"Included in our philosophy of what a librarian should be, is a stress on what he could not be. He should not be a 'keeper of the silence.'"

"It will take years to change the stereotyped image which most people see when they think of a librarian."

The expansion of the library program at Peabody has included an emphasis on raising the entrance requirements. All applicants must have at least a B average and an acceptable score on the Graduate Record Exam (GRE).

"As we expected," Dr. Gleeves concluded, "this more stringent entrance requirement has our enrollment at first but it is beginning to pick up again and as a result we are graduating a larger number of truly qualified librarians."

TO APPEAR HERE — The Precious Few, a recording group from Huntsville, Ala., will be here Feb. 23 for a dance sponsored by Alpha Kappa Psi.

# Draft confusion may lead to chaos in grad school

by RICHARD ANTHONY,  
College Press Service

Washington (CPS)—Last fall, education officials were saying that chaos would result if President Johnson didn't act to clear up the uncertainties in the draft situation by the first of this year.

The first has come and gone, the White House is still silent on the draft, and graduate schools and potential grad students are seeing the first signs of the chaos that was predicted.

There are two major questions that still must be decided regarding the draft: the first is, how are the actual draftees to be selected from the pool of draft-eligible men; the second is, what academic fields, if any, are to be designated as providing draft deferments for those doing graduate work in them.

## Council Has Power

(Under the terms, of the 1967 draft law, the National Security Council actually has the power to decide the second question. The Council includes high officials such as the Vice-President and the Secretary of State, as well as the President. In fact, though, the President will undoubtedly make the final decision on both questions concerning the draft. If any decisions are made.)

Graduate school deans have been predicting that their incoming classes next fall would be made up primarily of veterans and women, since they assumed most graduating male seniors would be drafted. This prediction may turn out to be true, but at

this point there's no way of knowing, because the President hasn't yet said who he's going to draft. Therefore, graduate schools which are beginning to make decisions on applicants can't tell whether or not the students they accept this spring will be coming in the fall.

## Problem for Students

A similar problem exists for students. College seniors and first-year grad students must plan for future study until the government's draft policies are cleared up.

At this point any speculation about what the White House will do must be very tentative, because there really is no way of knowing. Education officials with close contacts in government predicted action by the President before Christmas, and nothing came of it. There are, however, a few observations that can be made.

It appears that the President (or, in this case, the President and other members of the National Security Council) will not grant deferments to all grad students in the natural sciences,

math and engineering.

## Recommended Deferments

A special government committee set up to study the deferment question last year recommended deferments of this kind. Although the White House has not said anything publicly about a decision, education officials have been told privately that the President has rejected the committee's recommendations.

Whether he and the Council will designate certain narrowly defined fields as draft-deferrable is at this point unknown.

## Fudge party set

The annual Home Economics Fudge Party will be held at 7 p.m., Feb. 23 in the Foods Lab of the McCord Building.

Agriculture Club members and their guests are invited guests. At the last meeting of the Home Economics Club, Harriette Huey was nominated to represent the APSU chapter in the Miss Tennessee Home Economics Contest. Dianne Sego was nominated for the office of state first Vice-chairman, and Kathy Vaughan was nominated for state treasurer.

On the question of how draftees will be chosen, there is only one thing that can be said with a relative degree of certainty at this point—the White House will do something. If it doesn't, and if Congress also fails to act, then the traditional Selective Service method of drafting, the oldest eligible males first, will be followed, meaning that the army will be full of college graduates.

To make sure that there is some diversity in the ages of the draftees, the President will have to take action. What he will do, and when, however, is not clear at this point.

graduates will be drafted. Unfortunately there is no way of predicting which of them will be taken.

Morse and other education officials in Washington are now concentrating their efforts on getting Congress to clear up the draft situation. Although there is not much an individual student can do to get action from the White House, students can assist in pushing for Congressional action by writing to Senators and Representatives.

## Pryor named

(Continued from Page 1)

Clark, who has been serving as acting president as well as dean of instruction. Dr. Clark will continue in the capacity of dean of instruction.

"After my long association with the university, I have mixed feelings about leaving," Pryor said yesterday. "I regret leaving all of my friends and associates, but on the other hand I see the new position as an opportunity and look forward to the challenge which it offers.

"I am proud of my role in upgrading teacher education in the university," Pryor said.

Responsible for securing a number of grants for APSU Pryor served as consultant to the REACH project. He has also served as consultant to a number of school systems in the region.

Dr. Pryor served as university coordinator to COMET, a \$600,000 federal program designed to find, train and motivate and train unemployed and underemployed. Besides his association with APSU, Pryor's teaching experience includes positions with East Tennessee State University, George Peabody College and the University of Tennessee.

He has traveled extensively in Europe, Canada, Mexico and the Soviet Union. He contributed three chapters to "The Changing Soviet School," which was published in 1961 following his visit there in 1958.

A member of the First Presbyterian Church in Clarksville, he is past president of the Clarksville Kiwanis Club and the Clarksville and Montgomery County Mental Health Association. Pryor is also past chairman of the Montgomery County Cancer Society and a member of the Montgomery County Heart Association.

**THEATER-GOERS**—At one of the matinees last week, theatergoers from local elementary schools restlessly wait for the curtain to rise on the AP Playhouse's production of "Alice in Wonderland"....

## It's a different wonderland behind the scenes of 'Alice'

by MARY MAGEE

When a group of about 20 people have been working together three hours a night, five nights a week since the beginning of the quarter, things are sure to get lively every now and then.

This was what the cast of "Alice in Wonderland" discovered.

Everyone appreciated the polished performances of "Alice in Wonderland," but few were familiar with the problems and occasional backstage pandemonium which always accompany any production of this magnitude.

### Scenery is Foremost

First, and usually foremost, there is the scenery — which often seems to have a mind of its own.

A piece of the set flown 15 feet above the stage fell, missing the March Hare by inches. On another occasion, Alice and the Gryphon had a near catastrophe as he was lifting her backwards over a six-foot wall.

In spite of such slip-ups, there were no serious accidents on stage. Yet, one of the players broke his ankle while off the set and had to be replaced just a week

and one-half before opening night. Nevertheless, the production continued to move forward with little delay.

When not involved in rehearsal, the players entertained themselves and each other.

### Vaudeville Routine

Jim Rone and David Wesner, being showbiz-minded, even worked up a vaudeville routine which they performed for their small but enthusiastic backstage audience.

The veteran players have their little jokes that newcomers to the playhouse may not be familiar with. However, they were caught in their own trap when they tried to put one over on Alice, Barbara Mayhew when out of costume.

### Find a Door Stretcher

While working on the set, one of the players asked her to find them a door stretcher. They all laughed when she left, thinking she would feel very foolish when she realized what she was looking for.

However, Alice, being quite familiar with such things as sky hooks and door stretchers left all the work on the set to them while she pretended to look for the imaginary tool.

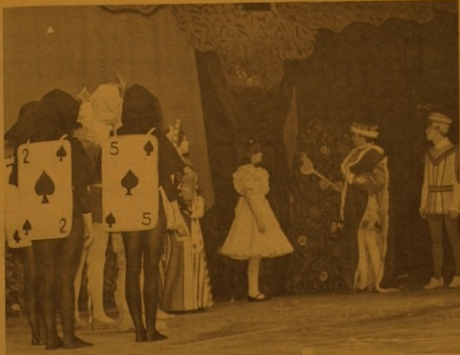

Three or four years ago, the playhouse fell victim to the inescapable "Murphy's Law," anything that can possibly go wrong before opening night most certainly will.

### Bad Weather

Aside from all the minor calamities involved in the production of "Alice in Wonderland," the law reared its ugly head once again in the form of snow and bad weather on opening night.

Despite set-backs, the cast-redoubled efforts and the show went on in true professional tradition.

Now that the "Alice in Wonderland" script is back on the shelves, many of the players are glad the play is over... but they'll be back again in top form for the next production.

... But once the curtain was lifted, they were completely captivated by Alice's adventures as she journeyed through Wonderland, such as her encounter with the King of Hearts.

# Join a firm that'll give you executive responsibility your first day at work.

Now, that's a pretty funny thing for a civilian firm to say. A boss? Right out of college? The first day?

But the Air Force can make such offers.

As an officer in the world's largest technological organization you're a leader, Engineer, Scientist, Administrator. Right where the Space Age breakthroughs are happening.

Or how about the executive responsibility of a test pilot clocking 2,062 mph in a YF-12A jet?

That could be you, too.

But you don't have to be a pilot in the Air Force to move fast. With your college degree you zip into Officer Training School, spin out an officer, speed on your way as an executive, in the forefront of modern science and technology. Right on the ground.

The Air Force moves pretty fast.

Think it over. A man's career can sometimes move pretty slow.

## Girls: take PEM's cue; play pool

Girls, why not take a cue from the Physical Education Majors' Club and learn to play pool? The PEM Club is going to sponsor two classes to teach the game of pool to interested coeds.

The first class will be held tomorrow evening from 6:30 to 7:30 in the recreation room of the University Center.

The second class will meet at the same time and place on Feb. 22.

The classes, which will be given free of charge, are designed to give girls an opportunity to learn the basic fundamentals of pool so that they will be able to make use of the pool table.

## Hardwood battles

# Govs close home schedule with Tech, ETSU

The Governors of Austin Peay State have several objectives in mind when they entertain Tennessee Tech this Saturday night and then host East Tennessee State on Monday.

First, these two games are the last home contests for the APSU roundballers, so, naturally, it would be nice to close out the home schedule with two wins. This becomes further significant when one considers that the Govs have dropped a record five straight home games.

Also, it will be the best chance for a couple of wins to add to the record, since the George Fisher-coached squad will have to travel to Middle Tennessee and Western Kentucky for the last two games of the season.

Thirdly, this will be the last home performance for the two seniors on the squad, captain Barry Rollins and alternate captain Bob Burnett.

The opposition will be considerable, as usual, Tennessee Tech has been playing some of the best

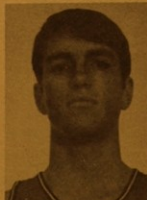

Barry Rollins

basketball in the Ohio Valley Conference of late. To make matters worse, APSU whipped Tech earlier this year at Cookeville, 72-66, so you can bet that coach Ken Sidwell will remind his charges of this fact in an effort to get his players up for the game. The big gun for TTY is guard Bill Bland. The 6-0, 172-pound sophomore was scoring 14.7

OVC STANDINGS		
Murray State	OVC	Over-all
East Tennessee	8-2	14-5
Morehead State	6-2	12-4
Eastern Kentucky	5-3	8-5
Middle Tennessee	4-4	8-9
Western Kentucky	4-5	11-7
Tennessee Tech	3-5	9-11
Austin Peay State	1-6	7-12

points per outing and hitting 50.2 per cent of his field goal attempts at last count. One reason that the Govs were able to defeat Tech in the first encounter was that they held Bland to six points.

The Sutton boys, Jim and Ron, are brothers but don't show any brotherly love toward opposing teams. Ron is averaging 9.1 rebounds per game while both are in the top 15 free throw shooters in the conference. Ketchel Strauss, 6-8 junior center, and Bob Chapman, 6-3 sophomore guard, will likely round out the starting line-ups. In previous contests with APSU, Chapman and Strauss led Tech's scoring efforts with 16 and 14 points, respectively.

Bob Burnett

In East Tennessee, the scarlet and white will face a squad which is currently battling for first place in the OVC. The ETSUers have an excellent amount of balance, size, speed and depth. APSU played probably its finest game of the season in Johnson City, but came out on the short end of an 83-80 count.

The Buccaneers have one of the

finest guard sides in the conference. Harley Seft is fifth in the league with a 16.5 ppg. average. He is also eighth in free throw percentage and 17th in field goal percentage. The 6-4 junior finds time to yank down 5.9 rebounds per game — not bad for a guard. The other guard, Richard Arnold, can be counted on for ball handling and nine points each game.

Ernie Sims, the big Buc center, is leading the OVC in field goal percentage (53.2) and is sixth in rebounding (11.9 per game). The 6-7 senior pumps in points at a rate of 14.1 each time out. Lesley Fisher and Mike Kretzer team up at forwards. Fisher got 19 points against the Govs at that earlier meeting, while Sims caused 11 and Seft added 17. Worley Ward and Larry Woods see considerable playing time for the East Tennesseans.

Defense and rebounding are ETSU's strong suits, so the Govs know what they will have to do if they are to win. It won't be an easy task, however.

## APSU Closeup

By

MOOSE MEHIGAN

### Game is significant

Although it may appear that the upcoming games with Tennessee Tech and East Tennessee State are not too important, this is not the case. The game will be the last home appearance for two Governor performers — Barry Rollins and Bob Burnett. Rollins has served as captain for the current cage squad while Burnett has fulfilled his duties as alternate captain. Both will be wanting to close out their careers as APSU roundballers with victories.

The importance of these games goes beyond these individuals, however. If the Govs are to have any hope of finishing higher than eighth place in the eight-team Ohio Valley Conference, they need these contests desperately. Tennessee Tech currently has three conference wins compared to one for APSU. The Golden Eagles are resting in seventh place. The scarlet and white's lone OVC win this year came at the expense of Tech when APSU edged the Eagles 72-68 at Cookeville.

The encounter with ETSU is important for both schools. It will be the last home game for the George Fisher-coached quintet this year. Also, the Fishermen have a score to settle with the Bucs, mainly an 83-80 defeat issued by ETSU in Johnson City. Burnett played possibly his best game ever for the Govs in that loss. The East Staters seem to hold a hex over APSU and always manage to win the close contests.

East Tennessee is battling for first place in the conference, having the same number of losses as league-leading Murray. ETSU has to face the Racers in Murray, so wins are of the utmost importance just in case Murray defeats the Bucs in that game.

Hence, the Governor cagers have an opportunity to play the role of spoilers.

## By 87-66 count

# APSU succumbs to Morehead

by BILLY BIGGER

Austin Peay State's basketball team showed some signs of returning to life last Saturday night at Morehead, Ky., but it wasn't enough as the Eagles downed the Govs 87-66.

Commenting after the game, coach George Fisher said, "I believe we learned some things tonight that we've been looking for all year. I hope we can put these things together and have a successful finish." The game was hotly contested for the first 13 minutes of action. Early in the game APSU enjoyed a three-point lead. Morehead tied the game at seven-all, never to give the lead back to the Govs. The game remained close until 7:14 showed on the clock. From here on the Eagles outscored the Govs 23-3 to take a 46-20 half-time lead.

The second half was battled on practically even terms. APSU twice trimmed the lead to 12 and 14 points, only to have Morehead pull back on in front to remain in control of the game.

The Govs were battling the Eagles on even terms on the boards until Joe Waller picked up his third personal foul.

"With Waller in foul trouble our height and board power suffered tremendously. It also hurt us on defense."

It was at this point that Morehead began to pull away from the Govs.

Over-all Fisher wasn't too disappointed with the team's performance.

"We got after those people pretty well. With the exception of seven minutes in the first half, we were in the ball game all the way. It's just going to take a little more effort and that little bit will amount to a winning effort."

Howard Wright again was the game's leading scorer as he poured in 25 points. Bob Burnett, who hit seven of 14 field goal attempts and five of six at the free throw line was the game's number two scorer with 19 points.

The remainder of the scoring was provided by Waller with eight, Terry Young — five, Jobie Miller — four, Charlie Moore — three, and Barry Rollins with two.

Danny Cornett, Larry Jordan and Jerry Conley each had 16 points to pace a well-balanced scoring attack for the Eagles. Close behind were Lamar Green with 15 and Willie Jackson with 12.

As a team, Morehead hit a hot 52.2 per cent from the field compared to the Govs cold 33.2 per cent. Both teams shot well from the charity stripe. Morehead hit 17 of 31 for 54.8 per cent while APSU was hitting 26 of 34 for 76.5 per cent.

Green and "Hobo" Jackson paced the Eagles rebounding with

**TIAC indoor  
this Saturday**

Track coach Max Mayes will be taking his squad to Knoxville this Saturday to compete in the Tennessee Intercollegiate Athletic Conference indoor track meet to be held there. The meet will be composed of a number of top-notch squads, including traditional SEC power Tennessee.

This meet will be the first of two that the Gavs will participate in before the regular competition begins in the spring quarter. Mayes summed up the competition in the TIAC meet in one word: Tough.

The TIAC indoor meet will be an opportunity for an under-fire analysis of the APSU track squad against rugged competition.

## APSU succumbs

(Continued from Page 6)

12 apiece as Morehead out-rebounded the Gavs 48-38. Wright was the APSU leader with 11.

"We stayed in our game plan all night," commented Fisher. "Of course the poor shooting hurt in the first half, but we never lost our poise and we didn't give up. And that's pleasing."

Morehead is now 5-3 in the OVC and 8-5 overall. APSU fell deeper into the cellar of the conference with a 1-8 conference worksheet and an over-all record of 7-12.

Fouled Out — None.  
 Total Fouls — Austin Peay 16, Morehead 22.  
 Attendance — 3,750.

## Bulletin

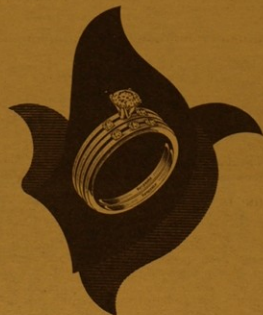

APSU fell behind early in the contest and never could catch up against the Eastern Kentucky Maroons in a game played at Richmond, Ky., on Monday night.

The Gavs found themselves behind 45-35 at halftime. In the second half Eastern came out with a hot hand and jumped to a 65-44 lead, but then APSU got a spark from Barry Rollins to cut the lead to 65-55. This was as close as the Governor cagers were to come. Eastern's biggest lead of the night was at 91-67 in the last couple of minutes. The Gavs scored the last 12 points of the contest to narrow the defeat to 91-79.

High-point man for APSU was once again Howard Wright, who ripped the nets for 27 markers. Terry Young had 13, Barry Rollins came off the bench for 12 and Bob Burnett added 11.

Scoring honors for Eastern went to Toke Coleman, who scored 23 points.

## PSA survey

# Government plays big role in our economic structure

This article, presented by the Political Studies Association, is the second in a series of reports based on a recent national attitudes survey of AFPSU students. The basic reason dealt with is the economic structure of the American political system.

by JEAN HOLLIS

Government involvement in economics is an issue which affects the everyday life of the individual.

Options on the issue are divided as to the nature and degree of involvement what areas may be regulated by government controls, and to what extent government may reach into the private lives of its citizens.

The position of the "welfare state" — the degree to which government should be concerned with the private circumstances of its citizens — was placed before AFPSU students in this proposition: "The government should see to it that nobody in this country is poor."

A resolution 70 per cent disagreed with government regulation of the individual's economic situation, 20 per cent agreed and 10 per cent gave no opinion.

The disagreement indicated an intense reaction against the proposition. Forty-seven per cent voiced strong disagreement while only five per cent voiced strong agreement. The undercurrent of opinion here tends to favor individual enterprise as a method of economic achievement.

### Negro Response Deviated

The response of Negro students sharply deviated from the total response. Sixty-five per cent agreed with the proposition, 21 per cent disagreed, and 14 per cent expressed no opinion.

This discrepancy may be understood in the context of the Negro's perception of his competitive position.

An economic system based on individual enterprise demands equal opportunity to compete.

The Negro community, as accepted minority, is most likely to be deprived of equal competition and become locked in a inferior economic situation.

Although the attitudes of students in respect to the general question of government involvement in economic matters considered considerable opposition, attitudes toward specific policy tended to be more favorable.

AFPSU students modestly supported government regulation of labor.

In response to the proposition — "The government in Washington ought to see to it that everybody who wants to work can find a job." — 59 per cent agreed, 31 per cent disagreed, and 10 per cent gave no opinion.

This proposition differs from the general question of "the welfare state" in implying the function of government is to provide an equal opportunity for all.

The role of government, in this view, is not inconsistent with individual enterprise.

### Interpretation Substantiated

This interpretation seems substantiated by the Negro reaction. Negroes demonstrate overwhelming support of government involvement — 92 per cent agreed with the proposition and eight per cent disagreed.

Without government regulation of labor practices, individual enterprise strikes at the Ne-

gro's opportunity to compete by allowing job discrimination.

In the past decade, government has served the Negro interest by removing some of these discriminatory barriers. His reaction can be viewed therefore in the light of the Negroes' interests as a deprived economic group.

The question of socialized medicine, involving the recent medicare issue — "The government ought to help people get doctors and hospital care at low cost" — received favorable response.

Fifty-eight per cent agreed with the proposition, 27 per cent disagreed and 15 per cent gave no opinion.

Socialized medicine, which certainly must be seen as government involvement in the individual's economic circumstances, displays support seem-

ingly inconsistent with the attitudes expressed in regard to the general proposition.

Seventy per cent of the total response disagreed on the broad question of government regulation of the individual's economic situation.

The discrepancy in attitudes seems to indicate there are areas of regulation which are not perceived as inconsistent with individual enterprise.

Response to the propositions concerned with labor and socialized medicine suggests, despite the aversion to government insertion into private economic competition, there exists general feeling that government should make the opportunities and resources accessible to all its citizens.

Government involvement in education received tremendous support from AFPSU students.

GET THE POINT?—To make their point clear during a recent cancer workshop, representatives from the American Cancer Society hung one of their posters where they thought it would do the most good.

## Art of conversation

# Style file

by SHIRLEY PARCHMAN

Your friends' impressions of you are created not only by the style of clothes you wear or the way you wear your hair, but also by the inward attractiveness of the real you.

Your personality and manners play a vital part in the appearance of your most important side — your inner self.

Since there are numerous phases of personality "fashions," this article will discuss only one phase—the art of conversation.

Certainly, every person cannot be born with a power over words and a well-rounded vocabulary; however, as an individual, you can improve the impressions that you display through your conversations.

To begin, you must analyze your speech, discover your faults, and practice these faults in their correct forms.

Perhaps, you may have to overcome self-consciousness or the impulse to remain silent.

Without dominating the conversation, you should develop the courage to express your own personal ideas and viewpoints. Likewise, do not become a hypocrite in your conversations.

When talking to your friends, show that you are really interested by being a good listener and avoiding subjects which may intrude into their personal life—most likely, if they want you to know, they will tell

you anyway, in full detail.

If you realize that your conversation is becoming an autobiographical monologue, quickly turn the subject toward the interest of your audience.

The quality of vocabularies is perhaps the greatest divider of communication.

As you continue to increase your vocabulary, you should also develop the ability to express yourself.
