*	5	53	-3.8%	4	-3

### ADDITIONAL INFORMATION

Numbers for 4/7/2022 reported through 4/2/2022. Data is continuing to show a baseline low number of cases in the community. Unfortunately, the number of deaths has increased slightly. This appears to be a solid baseline for endemic for SARS-COV-2, provided the numbers reported are accurate. There appears to be some surges in cases nationally particularly in the Northeast United States (see last figure, per CDC and Heather Phillips). Until the community data is more reliable the campus COVID-19 data is probably an early, better indicator of our environment.
