APSC Expansion Program Announced

Morgan, Sexton Instrumental In Long-Range Development

MORGAN SEXTON

"As we looked to the future it became evident that rather skillful planning for campus development was essential," comments President Joe Morgan concerning Austin Peay State College's announced 10-year expansion program.

With this in mind a long-range planning committee was appointed by Morgan shortly after his inauguration as the fourth president of APSC on Jan. 1, 1963. The committee served in an advisory capacity to President Morgan for the purpose of formulating a long-range campus development plan which was submitted to the Tennessee State Board of Education.

Earl E. Sexton served as chairman of the committee with Dr. Harold S. Pryor acting as secretary. Other members of the committee included Dr. Leon Bibb, Dr. Tom Cowan, George Fisher, Glenn Gentry, James Hamilton, Dr. Milton Henry, Dr. Haskell Phillips, Joe Suttin, Dean Tom K. Savage, R. C. Shasteen, Dean F. G. Woodward, James Hester and then vice-president of the student body, Jesse Lam-

berth.

Additional members outside of the college included Charles W. Crow, mayor of the city of Clarksville; William O. Beach, county judge; Rufus Johnson, chairman of the Regional Planning Board; and Ben Kimbrough, president of the Clarksville Chamber of Commerce.

The services of Jefferson Hamilton of the University of Florida were secured as a consultant for the proposed planning. Perhaps the most outstanding consultant in the United States on campus planning, Hamilton has designed campus plans for nearly 20 campuses throughout the nation. Some of the colleges and universities include Florida, Stetson, Rollins, Birmingham-Southern, Auburn and Daytona Beach Junior College.

A bit of history prior to Hamilton's selection shows that the master plan for campus development was initiated by action of the

(Continued on Page 8, Col. 3.)

The fully-processed color photo is this one. It is another first for The All State. It takes its place along side the 12-page edition (largest ever) which was published in December in memorandum to President Kennedy.

The All State, the voice of the students, takes pride in presenting this issue for your enrichment.

The editor and staff wish to take this chance to publicly thank our advisor, Shervin Cline, director of public information, for his valuable contributions which appear on pages one and eight.

Modern Dorm To Be Finished By October 1

There will be sounds of jackhammers, not music, but it will be music to the ears of President Joe Morgan and Dr. Tom K. Savage, dean of students, as construction continues on the new men's residence hall to be located on the west side of the campus of Austin Peay State College.

Ground was broken January 23 for the three-story, fully air-conditioned dormitory which is slated for completion by Oct. 1, 1964.

The structure, shown at the bottom of this page, has been contracted by the R. K. Smith & Co., Inc., Clarksville, Tenn. The dormitory, including furniture, will cost \$417,000. The building will be of modern design and was planned by the architectural firm of Hibbs & Johnson, Clarksville, Tenn.

According to Dean Savage, the building will be L-shaped design with a single landing outside corridor. Full bath facilities will be provided for each suite of two rooms. Other outstanding features include built-in desks and wardrobes, lobby, combination concession and laundry room, supervisor's apartment and parking area.

The showpiece will house 100 male students in 49 double rooms and two single rooms. This will bring the total to approximately 550 single male students who can be housed in dormitories on campus.

Ten-Year Plan To Double Facilities And Enrollment

An unprecedented building program that will cost \$12 million and more than double the facilities and enrollment in the next eight to 10 years began nearly a month ago at Austin Peay State College with the breaking of ground for a new men's residence hall.

The building bonanza calls for the construction of 20 new buildings by 1974 for an expected enrollment of between 3,600 and 4,200 students.

Early Admission Program Offers Two Plans

Since the publication of The All State last week, F. G. Woodward, dean of the faculty, has revealed that the early admission of the academically talented program is divided into the Summer Plan and the Academic Year Plan.

The Summer Plan allows the student to earn college credits in the summer of his junior year. These credits are validated when the student has graduated from high school.

The Academic Year Plan allows the student to register as a full-time student in the Fall Quarter and pursue a regular curriculum which will include the equivalent of the remaining courses needed to complete requirements for the high school diploma.

With the completion of these courses, by arrangement with the State Department of Education, the student is certified back to

(Continued on Page 8, Col. 5)

The campus development program, under the direction of President Joe Morgan, calls for the addition of a library, a student union building, nine men's dormitories, two women's residence halls, four classroom buildings, two recreation centers and married students apartments to meet the needs of the young men and women who will engulf the college campus during the next decade. A central chilling unit for air-conditioning and an underground electrical distribution system are also planned for the future.

Operating from a master plan for campus development as set up by a long-range planning committee composed of college officials, city and county leaders, planning consultants and approved by the State Board of Education, the first stage of construction calls for the completion of a men's dormitory (No. 21) on the master plan on page 8) by Oct. 1, 1964, a library (No. 7) and student union (No. 8) to be completed in 1965.

Supplemental to the above plan, application has been made for a

College Progress Measured By Expansion Program

One of the measuring devices for determining the progress of a college or university is the proposed future expansion set up by the officials of the institution. Austin Peay State College is no exception to this fact and is proud to have her progress measured in such a manner.

The 10-year expansion program, which has been proposed by the long-range planning committee and is shown on page eight in this edition of The All State, shows that the leaders of APSC are in no way ready to rest on their laurels and let things at the College become stagnant.

For nearly 14 months this committee, composed of college officials, city and county leaders, planning consultants and the State Board of Education, has been working with one thought in mind -- the improvement of and the movement toward a better Austin Peay State College.

The program, as set forth by the planning committee, has been established and is now underway. The construction of the new men's dormitory (shown on page one) began January 23 and will be completed on or before Oct. 1, 1964.

Dates for the beginning of the construction of other buildings have not been set yet, but they are not too far in the immediate future.

As important as the expansion of a college is, it is equally or even more important that the edu-

cational opportunities also continue to increase. Again, the leaders of APSC are not content and are continuing in their efforts to make Austin Peay State one of the most respected institutions of higher learning in the state and the mid-south.

As was announced in the last edition of The All State, eight new teaching majors on the graduate level will be offered at the College beginning the Spring Quarter.

Also added to this list is the addition of a master's degree in guidance and counseling plus a major in psychology on the undergraduate level.

The campus of Austin Peay State College has been referred to as "The Friendliest Campus In The South" but it might also be added that it is one of "The Most Progressive Campuses In The South" as well.

The proposed expansion of the College and the addition of degrees and majors are just a few of the indications that Austin Peay State College is one of the fastest growing institutions in the mid-south. This progress will continue to come, we feel, because of the desire of the college officials to see that progress never stops in the ever increasing effort to accomplish its goal -- the preparation of educated individuals for the purpose of educating others.

J.R.M.

Letters To Editor

Dear Editor,

Growing pains seldom are comfortable either to the grower or to the persons who watch and are involved from the sidelines.

The Austin Peay State College library is experiencing such growing pains constantly. The library staff must ask the indulgence and understanding of the students and faculty during the next few weeks while a major shifting of the stack collection is accomplished.

It is not always possible to have shelves for expansion available in the most advantageous places; therefore, this major shifting of the collection is necessary to make available room for expansion so that the inconveniences experienced later as the collection grows will be held to a minimum.

The locked case area has been decreased in size to make more open shelves available on the third tier of stacks. The 900's will expand into this area. The Tennessee collection will be moved to the half shelving at the back of the third tier stacks. The 800's - 812's, formerly shelved in the lower stack reading room will be moved also to the third tier.

The Government Depository pamphlet collection which formerly has been on half shelving on the third tier will be moved to half shelving on the lower tier. The 400's and some of the 300's will be moved into the stack shelving of the lower tier. This will allow for expansion where it is badly needed in the 0's - 300's on the lower tier.

This means that, during the moving process, it may be difficult sometimes to find the collection that you want, the classification numbers you need and even the particular book which you want. The library staff will try to be as helpful as it can during this period of necessary confusion. We hope that you will accept our statement as you do road construction signs and understand that this inconvenience is necessary for your future convenience.

Sincerely,
Miss Johnnie Givens
Head Librarian

Professors Speak Out

Testing, 1, 3, 2, 4, . . .

By Charles Waters, associate professor of English

"The world is a vast show window in which some prankster has switched the price tag." I was reminded of these words as I read, with considerable interest, an article in a recent issue of The All State indicating that students desired more tests. It is inspiring for a teacher to know that students are eager to be tested, but it becomes ironic when one discovers that the students want the tests for the wrong reasons.

Frequent testing is certainly to be desired because tests motivate the student and indicate to him how well he is doing. Properly administered, they stress what is important in the course. For the teacher, they measure his own effectiveness. So it is with a great deal of interest and a feeling of pride that I continued to read the article.

The sting came when I discovered that the students wanted the tests not to promote the accumulation and assimilation of knowledge but rather for just the opposite reason -- to relieve them, and perhaps the teacher also, of the responsibility of having to accumulate and assimilate knowledge. The student consensus appeared to be that they like to be given an assignment or a chapter, to be told what is important in it and then to be tested on it immediately so they may promptly forget it and go on with the next assignment. In this way the final examination can be approached with a comfortable backlog of good grades. This makes it practically impossible to fail the course even if the teacher happens to be so cruel as to give a final which requires the application of the knowledge that has been previously memorized and disgorged on the smaller tests.

I can understand the safety in such testing programs for the tests become like deposits made on a savings account. Such testing is also a comfort for the teacher. He has but to show the balance to justify or reconcile the account with the student. If it is a lovely system for all concerned and most of us use it in one way or another, but I wonder if it really has anything to do with education.

Food taken into the body and disgorged immediately will not provide nourishment. It would be an effective means of dieting, but it would soon produce an emphysemic person. I believe the same analogy holds true with knowledge swallowed whole today only to be disgorged tomorrow on a test. The teacher gets back what he gave and the student gets back what he got. Nothing is lost in the process. The student, if he has the intelligence of a parrot, gets a good grade; and the teacher, if he has any ability as a trainer, chalks up another success. And this we call education. Great are its rewards in terms of degrees.

But now we are ready to spend our academic earnings. The total of the little tests will not buy much on an examination that requires an understanding and an assimilation of the knowledge. Memorized theorems will not solve problems in mathematics, nor will memorized but not understood critical theories determine the worth of a poem. Nor will empty degrees make good teachers. I could go on, but I have already labored the point.

What do I advocate in testing? I feel that frequent tests should be given, but I feel that the mid-term and the final should require the application and the understanding of the material covered in the whole course. I also advocate a comprehensive examination at the end of each program leading to a degree. But this is what we all do! Let's ponder the question while I prepare my daily quiz.

Notice To Bridge Players

A duplicate bridge course for beginners, presented by the Clarksville Duplicate Bridge Club will be held in the Student Center each Monday night from 7 to 9 beginning March 23, R. C. Shastien, business manager, announced today.

In order to organize the course interested students should fill out an information form which may be obtained in the Business Office. There is no cost for taking the course.

Each session supervised by club members who will also instruct, is open to anyone desiring to attend.

Further information may be obtained by contacting Shastien.

Klub Korner

The Kolonia Klub meets Thursday night at 6:30 in the Student Center. Everyone is invited to attend.

— □ □ □ —

The Wesley Foundation will meet Sunday evening at 5:30 at the home of Dr. and Mrs. Floyd Ford for the regular Sunday night program.

All persons interested in attending are requested to place a note in either Box 4499 or Box 4852.

— □ □ □ —

The Baptist Student Union will meet for vespers Thursday night at 6:30 in the choral room, Clement Building. Besides the devotional period, the trip to Southern Baptist Theological Seminary on March 28 will be discussed.

Jim Phillips, the newly installed president, urges all students to attend.

— □ □ □ —

Larry Scott, Jerri Hargis and Bill Russo were initiated into the Chi Rho Honor Society at the club's winter meeting last Thursday night.

To become a member of Chi Rho, the candidate must be active in the Methodist Church or the Wesley Foundation and maintain a 3.3 academic record.

Just Take A Look

"Grow with Austin Peay State College." Most everyone has noticed that slogan stamped on their mail. For the passing student, it is just a trite expression.

"Grow with Austin Peay State College." It is easy to ignore the words, but what is the reaction when one thinks back four years and views the College's expansion?

1. Harvill Hall, Blount Hall, the Clement Annex, Ball Village and Miller Hall have been constructed in this short span of time.

2. Enrollment has risen from 1550 in 1960-61 to 2228 this year.

3. The regular cafeteria service has been switched to a catering service which will offer a greater variety of food and greater versatility in banquet service.

4. The graduate program has been expanded to offer eight new majors in the M.A. degree in education. Emphasis has been shifted from education courses to content field.

5. And most recently, an early admission program for academically talented students has been announced for this summer.

Austin Peay State College is on the move. We cannot imagine the consternation of the alumni who return every year or two and see a new dorm or a new classroom building. In order to get a slight feeling of what it is like, stand in the center of the campus and point at the buildings which have been constructed since you enrolled as a freshman. Do this once a year and you will begin to realize the rapidity of the growth of our College. R.A.

Will Serve Sunday Evening Meals

Philadelphia Firm To Operate Campus Food Services - Sunday

"Food for thought" can be taken literally as a new food service contract has been awarded for the operation of the college cafeteria.

Dr. Tom K. Savage, dean of students, announced to The All State that Slater School and College Services, a division of Automatic Retailers of America, will assume the management and operation Sunday, March 1.

Slater's home office is Phil-

adelphia and the southern regional office is located at Atlanta.

This decision was reached after an intensive and exhaustive study was made of many bids and bidders by a special committee of the administration, the faculty and the student body.

During its deliberations, the committee emphasized quality food and services with management oriented to campus and student life.

Salient features of the new contract include the retention of the present scale of food portions and prices and the addition of Sunday evening meal service during the regular sessions.

The new management has indicated its desire to cooperate with the College in planning special meals, banquets, breakfasts and refreshments for social events.

The cafeteria will continue to be available for social and recreational activities which do not conflict with regular cafeteria service.

A student committee will continue to serve in an advisory capacity to the administration and to the management service, Dean Savage emphasizes, "Chancellor will be provided for students to voice their criticisms and suggestions for improved service."

He further stated, "Although no miracles are expected, the College believes that it has secured the best service available and that constant scrutiny will be given the total service with a view to improvement."

Mathematics Department

MATHEMATICS DEPARTMENT - Members of the mathematics department at Austin Peay State College are (l to r) Dr. William G. Stokes, department head; George Brotherton, William Crabtree, Jr., Neil Ross and James Stack. (Staff Photo by Don Reese)

By Jan Letwisch

Math is NOT addition, subtraction, multiplication and division, according to Dr. William G. Stokes, professor of mathematics and chairman of the mathematics department. If you have been a disillusioned student who thought mathematics was a practical subject to be applied to filling out income tax forms and tabulating grocery expenses, wake up! Math is a changing, evolving, developing field of important scientific study. It is an intricate science.

With that enthusiastic introduction Dr. Stokes will proceed to explain that his favorite subject is wide open for application in industry and education. He adds that the more practical, usual idea of math is taught in the accounting department. He concedes that it is important, but his heart is with the science.

The mathematics department is trying to keep pace with modern developments. Its members are Dr. Stokes; George L. Brotherton, assistant professor of mathematics; William Crabtree, Jr., assistant professor of mathematics; Neil M. Ross, instructor in mathematics; and James T. Stack, associate professor. The emphasis of the de-

partment is on new curricula including a Saturday teachers-in-service program and a program for advanced high school students.

The Saturday classes for high school students are supported by the National Science Foundation and will be continued next year through the same source.

The staff is keeping right up to date with the advancement of mathematics. Its members have attended institutes and conferences for college teachers the past two years. The programs are sponsored by the National Science Foundation. Brotherton attended the University of California, Harvard and Vanderbilt for short conferences. Crabtree has been to the University of Wyoming, Clemson College and Auburn University. Ross visited the University of Notre Dame for the past two summers. Dr. Stokes went to the University of Maryland last summer and, before that, he was at Oklahoma State University.

The travels of the department members could qualify the department as a travel agency or a part of the geography department.

The Cambridge Report on Mathematics is a revealing example of the fast progress of the field. You remember what your parents considered math. You know how much more you studied under the same title. Think about what the next generation will face: in grammar school, an introduction to algebra and mathematical reasoning; in high school, college mathematics; in college—who knows?

With these predictions in mind, the department has recently gotten a full year of math added to the requirements of elementary teachers. Next year another three quarters of elective math will be offered.

The Committee on the Undergraduate Program in Mathematics, CPUM, outlined the requirements of both elementary and high school teachers for the future. The department tries to follow its suggestions as closely as possible.

Dr. Stokes thinks that math 200 is an important course in all APSC student's programs. It is a necessary ingredient for the final product of education. He says, "I'm probably in a minority about this."

Guest Soloist

DON JACOBY

Don Jacoby, virtuoso of the trumpet, will appear as soloist with the Austin Peay State College Concert Band on Wednesday, February 26 at 7:30 p.m. in the Clement Fine Arts Building.

Admission to this music scholarship fund concert is \$1.00 per person. All proceeds are for the APSC Band Scholarship Fund. Tickets may be purchased at Collins Music Store or at the box office the night of the concert.

By TONY BOEHMS

Basketball

Finale

The Western Kentucky State College Hilltoppers invade Memorial Gymnasium Thursday for the final game of the 1963-64 season for the APSC Governors.

The Governors host the Hilltoppers in varsity and freshman encounters with the clash between the yearling squads getting underway at 5:30 p.m., followed by the varsity contest at 7:30.

Four APSC roundballers will play their final game as a Gov cager. Doug Stamper and Steve Miller, transfers from Morehead State, have had record-breaking career performances playing for the Scarlet and White. Henry Murray and Blakey Bradley will also see action for the last time.

The varsity, a winner by a 73-69 count at Western, will be out to improve on a favorable conference record and maintain this season's dominance over the Hilltoppers.

The Hilltoppers will counter with the league's No. 2 scorer in Darel Carrier who is averaging better than 26 points per game and hitting just under 50 per cent of his shots from the field.

A victory over East Tennessee, the league leader at that time, proved Western's ability to have a hot night and the Kentuckians could find the range again Thursday night.

The freshman squad will try to improve on the Topper yearlings, noted by many observers as one of the best fresh squads in the nation.

Racers Stalled

Additional support to theories that the Governors are a better road team than host team was shown in the recent Murray game.

Leading by six points at the half the Govs were pressured into several foul shots that gave Murray the 69-58 victory and the conference lead.

Outstanding in the game for APSC was Dwight Norris who hit his first 12 shots of the ball game to keep the Govs in front.

An unsung hero of the game was junior center Seldon Shedd, praised by Governor coach George Fisher, said, "That boy turned in the best performance I have seen in my coaching career — bar none!"

Shedd, with his cat-like moves hauled in 17 rebounds, scored 10 points and, in Fishers' words, "was responsible for 40 more."

Even though the Thoroughbreds are perched atop the conference standings it can safely be said that they are only there by the help of forward Al Varvas who put the Racers ahead via a free throw with only 11 seconds remaining.

The evening was not a total loss since the Gov yearling squad came through with a 68-61 victory over the young Thoroughbreds.

The victory was the first and only win the squad scored on the opponents' floor this year.

Melvin Van Hooser turned in another outstanding performance with 23 points while Hal Jackson (19) and Benny Morgan (18) gave ample support to the Governor cause.

The Last Word

—Veteran Western coach Diddle is the winningest active college coach in America. His Hilltopper teams have won 758 and lost 298 during his 42 years as head mentor. Only Kansas' now retired Phog Allen, with 771, can boast more total career wins than Diddle.

—Four Gov cagers have scored 36 or more points in a single contest. Jim Beshears is tops with 43, but he also scored 41, 40 and 37 while trailing for APSC. Stamper mirrored 41 last year. Tom Morgan came 38 in 1955; and Kenny Gerald popped for 36 one year later.

—Bob Bradley commands the individual single game rebound record with 27 grabs against Southern Illinois in the 1958 opener.

Four Seniors Close Out Varsity Basketball Careers

PRACTICE FOR FINAL VARSITY GAME — These four basketball players will close out their college careers for the Austin Peay State College Governors this Thursday when the Govs host the Hilltoppers of Western Kentucky. Practicing their foul shooting in preparation for the contest are (l to r) captain Steve Miller from Louisville, Ky.; Doug Stamper from Hamilton, Ohio; Blakey Bradley from Clarksville, Tenn.; and Henry Murray from Nashville, Tenn. (Staff Photo by Billy Hutton.)

When the final horn sounds Thursday evening ending the basketball season for Austin Peay State College, four seniors will have completed their varsity competition for the Governors.

The four members of the squad include Blakey Bradley, Steve Miller, Henry Murray and Doug Stamper.

During their varsity competition at APSC these four have accounted for 2516 points and 1424 rebounds in 75 games.

They led the Govs to two consecutive Volunteer State Athletic Conference Western Division championship and one runner-up title in the VSAC tournament, a fourth place finish in the National Collegiate Athletic Association regional tournament at Louisville, Ky., and a successful debut in the Ohio Valley Conference.

During their careers they had a combined win-loss record of 43-32 (not including the last three games of this season), beating such teams as Southern Illinois University, Pan American of Texas and Arkansas State.

Stamper has been the leader of these four with 1122 points and 287 rebounds. He is a 6-2, 170 pound guard and has been averaging better than 19 points a game in the last two seasons.

As a junior Stamper was named to the NCAA All-South Central regional squad and was voted the most valuable player in the Western Division of the VSAC. He also served as co-captain of the Governors during his junior year.

Miller has been the No. 2 man behind Stamper the past two seasons averaging better than 12 points a season and pulling down rebounds at an average of better than eight per game.

A 6-5, 180 pound center, Miller holds one school record and led the varsity in two categories his junior year. The record held by Miller is the best field goal percentage for a season. He hit a blistering 533 percent of his field goal attempts and was ranked in the top 20 in the nation among small colleges with this average. He led the team in free throw percentage with a percentage of 76%.

Elected as captain of this season's team, Miller has been described as an all-around team player by opposing coaches and players alike.

Murray is a 6-6, 185 pound forward-guard for APSC. He was elected co-captain his junior year and selected this season as alternate co-captain.

His best asset is his ability to handle the ball even though

he is not one of the so-called "small men" in basketball. He was, along with Stamper, responsible for a successful 12 minute and 45 second freeze this season against Tennessee Tech which helped APSC defeat the Eagles.

During his career Murray has scored at better than eight points per game and rebounded at a seven plus average. This season, Murray was elected to the all-tournament team at Quincy, Ill. Bradley has seen only limited action for APSC but his hustle and desire brought praise from the coaches whenever he got into a game.

Standing 6-5 and weighing 185, Bradley has been one of the better rebounders on the squad. He has shown tremendous improvement over his first two seasons and will close out his career still showing the desire to win.

When these four close out their careers Thursday, a great loss will be felt, not only by the basketball team but by the student body as well.

LEARN TO PLAY BRIDGE

A course for beginners (10 classes); each Tuesday evening beginning March 3, 1964, 7:45 P.m. \$10.00 plus \$1.00 book. For further information, call Mrs. Ed Irwin, 647-3003.

Govs Face Hilltoppers Thursday

"Let's close this season on a winning note!" is the saying going around the campus of Austin Peay State College as the final game of the 1963-64 basketball season draws nearer.

The curtain ringer will find the Western Kentucky Hilltoppers of Bowling Green, Ky., invading the Memorial Gymnasium Thursday night for the finale of APSC's initial season in the Ohio Valley Conference.

The Governors will be out to garner another victory from the Hilltoppers and even their abbreviated series with Western at 2-2.

Earlier this season the Govs defeated the Hilltoppers at Bowling Green by a 73-69 margin.

Cagers Of Week

NORRIS SLEDD

Seldon Siedd and Dwight Norris have been selected as cagers of the week for their outstanding performances in the Governors heart-breaking 69-68 loss to Murray State last week.

Siedd played the finest game of his college career against the Thoroughbreds. He led all rebounders with 17 and scored 10 points.

Norris, playing his finest game of the season, led APSC in scoring with 19 points. He came off the bench midway of the first half and hit six straight field goals and five straight free throws for 17 points in the first half.

Prior to this season the two teams had not played since 1941 when the 'Toppers defeated the Govs twice.

Leading the George Fisher-coached jump will be dandy Doug Stamper, a heavy favorite for all-OVC honors. Stamper has been the team leader for the Red and White all season and will be closing out an illustrious three-year varsity career with a chance of becoming the second most prolific scorer for a three-year player in Governor game history.

Other probable starters for APSC include Richard Keller at guard with Stamper, Seldon Siedd at center, and Steve Miller and L. M. Ellis at the forwards.

Top Sport Award Presented

To Frosh Cager

Hal Jackson, 6-3 freshman cager at Austin Peay State College, was awarded the individual sportsmanship trophy in the Henderson (Ky.) Invitational basketball tournament which concluded last Friday.

Jackson, from Doni Pham, Mo., scored 39 points in the two-day affair which saw L. J. Sanders frosh cagers lose a heart-breaking opener to the Kentucky Wesleyan frosh by a 105-100 margin in overtime before winning third place with a 95-58 victory over Oakland City (Ind.) College.

Sports Shorts

APSC's all-time basketball record (through the Murray game) was 418-296 for a very respectable .585 winning percentage.

The Ed Diddle-coached Hilltoppers will have as probable starters Darel Carrier and Charles Sheffield at the guard slots with Ray Keeton, Ralph Townsend and Ronnie Kidd as back-liners.

Spring Drills For Footballers Underway

Austin Peay State College's grid fortunes began spring drills Monday, February 17 and simultaneously head coach Bill Dupes announced the signing of another outstanding footballer.

Weather permitting, the Governors hope to complete their allotted 20 days within the 36-day time limit.

The latest signee is Gary Ridgway, 6-2, 200 pound guard from Rossville, Ga. Ridgway was an all-Mid-South performer at Tennessee Military Institute, Sweetwater, this year. He formerly played for Rossville High School.

Of Ridgway Dupes said, "He was widely sought by several colleges and universities and we might convert him to center. We're proud to get him."

Ridgway's signing brought APSC's list to three as Fayetteville's Jerry Taylor, all-league midrange guard, and end Billy Joe Joans inked Ohio Valley Conference contracts earlier.

THE SLOW RUSH

Illustrated below is the membership pin of a brand-new national fraternity called Sigma Phi Nothing. To join Sigma Phi Nothing and get this luscious membership pin absolutely free, simply take a pair of scissors, cut out the illustration, and paste it on your chest.

Let me hasten to state that I do not recommend your joining Sigma Phi Nothing. The only thing I recommend in this column is Marlboro Cigarettes, as any honest man would who likes good tobacco and a good filter, whose heart is quickened by a choice of soft pack or Flip-Top Box, and who gets paid every week for writing this column.

I am frankly hard put to think of any reason why you should join Sigma Phi Nothing. Some people, of course, are joiners by nature; if you are one such, I am bound to tell you there are any number of better organizations for you to join—the Cosa Nostra, for example, or the Society for the Placing of Water Troughs in Front of Equestrian Statues.

But if you insist on joining Sigma Phi Nothing, let me give you several warnings. First off, it is the only fraternity which admits girls. Second, there is no pledge period; each new member immediately goes active. Perhaps "inactive" is a more accurate word: there are no meetings, no drives, no campaigns, no sports, no games, no dues, no grip, and no brow.

The only thing Sigma Phi Nothing has in common with other fraternities is a fraternity hymn. In fact, two hymns were submitted to a recent meeting of the national board of directors (none of whom attended). The first hymn goes:

Sigma Phi Nothing,
Shining star,
How we wonder
If you are.

The second hymn, rather more poetic in content, is to be sung to the tune of *Also Sprach Zarathustra*:

A Guernsey's a cow,
A road is a lane,
When you're eating chow,
Remember the mein.

Pending the next meeting of the national board of directors (which will never be held) members are authorized to sing either hymn. Or, for that matter, *Prenez*.

Perhaps you are wondering why there should be such a fraternity as Sigma Phi Nothing. I can give you an answer—an answer with which you cannot possibly disagree: *Sigma Phi Nothing fills a well-needed gap.*

Are you suffering from mental health? Is logic distorting your thinking? Is ambition encroaching on your native sloth? Is your long-cherished misanthropy retreating before a sea of facts? In short, has education caught up with you?

If so, congratulations. But spring is upon us and the sap is rising, and the mind looks back with poignant longing to the days when it was a puddle of ureasoon.

If—just for a moment—you want to recapture those carefree vapors, that wacky, squishy confusion, then join Sigma Phi Nothing and renew your acquaintance with fecklessness. We promise nothing, and, by George, we deliver it!

Who's Got The Scissors?

By Alvin Oates

Now that The Beatles have happily winged their way home again burdened with a few American dollars picked up here and there for their appearances, it seemed appropriate to take just one more parting shot at them.

Several students were asked how they felt about The Beatles —uh, The Beatles.

Sue Lander, junior, elementary education, LaFayette, Ky. "I like them. It reminds me of my childhood days and Elvis Presley."

Joe Wood, junior, agriculture, Hopkinsville: "I had rather listen to them on recordings than to watch them on television. I rate their music as fair."

Frieda Walker, senior, elementary education, Clarksville: "I like to hear them sing but I don't like to look at them."

Ronald Arvin, junior, English and history, Hopkinsville: "I support Chicago's campaign to

wipe out The Beatles. At best, they are musical balaams. They are probably England's retaliation to the 'brain drain' (The American universities are hiring England's top professors)."

Diane Miller, sophomore, elementary education, Clarksville: "I like to hear them but I cannot stand to look at them."

Charles Waters, associate professor of English, Clarksville: "Anyone who can make money like that group has, it's pretty clever. I admire them very much because they came over here without any pretense. They came for the money and got it."

And as my landlady, Mrs. Edith Strout, said, "I like their singing very much, but I think someone should give them a haircut."

Thus ends the case against America's most recent crisis, The Beatles.

History Society Publishes Johnson's Paper

A historical paper by Dr. William R. Johnson, assistant professor of history, was published in the January issue of The New York Historical Society Quarterly.

The paper, "Prelude To The Missouri Compromise", portrays the efforts of Congressman John Taylor of New York to exclude slavery from the Arkansas Territory.

For the Arkansas Territory Taylor proposed an amendment similar to the Talmadge Amendment which freed all slaves in Missouri when they became 21. Due to Southern opposition and Northern constitutionalism, the Taylor Amendment was not passed and slavery became an institution in Arkansas.

Reed And Barton To Sponsor Local Contest

During the months of February and March, Reed & Barton, America's oldest major silver smiths, are conducting a "Silver Opinion Competition" in which valuable scholarships totaling over \$2000 are being offered to duly enrolled women students at a few selected colleges and universities.

Austin Peay State College has been selected to enter the competition in which the first grand award is a \$500 scholarship, the second grand award is a \$300 scholarship, the third grand award is a \$250 scholarship, the fourth, fifth and sixth awards are \$200 scholarships, and the seventh, eighth, ninth and tenth are \$100 scholarships.

In addition, there will be 100 other awards consisting of sterling silver, fine china and crystal with a retail value of approximately \$50.

In the 1964 "Silver Opinion Competition," an entry form illustrates twelve designs of sterling silver, fine china and crystal.

The entrants simply list the three best combinations of sterling silver, fine china and crystal from the patterns illustrated.

Scholarships and awards will be made to those entries matching or coming closest to the unanimous selections of table-setting editors from three of the nation's leading magazines.

HomeEconomists Attend Meeting

Seven home economics majors attended a three-hour workshop recently at David Lipscomb College in Nashville.

Mrs. Doris Milton, head of the home economics department and associate professor of home economics, and the girls—Lynda Trotter, Linda Edmondson, Carol Allen, Penny Frazier, Barbara Fulton and Janice Lefwich—listened to three speakers.

Dean Mack Wayne Craig of Lipscomb called home economics the oldest of arts and the newest of sciences in his interpretation of home economics and its value to the woman. Miss Mable Yates, voted Woman of the Year by the

Progressive Farmer, talked about the value of home economics in education. Mrs. Anne Eaden, home economist with the Kroger Company, spoke to the girls about the value of home economics in business.

The Lipscomb hostesses provided a luncheon meal at their home management house for the girls at the meeting.

Two of AFSC's students are in competition for a state office in the Home Economics Club. Penny Frazier is a nominee for president. Barbara Fulton is a nominee for the office of third vice-president of the THEA college club chapter.

Coed of Week

This lovely blue-eyed brunette is Miss Sandra Barnett, coed of the week. Sandra, a sophomore from Hopkinsville, Ky., stands 5-4 and measures 36-24-35. She is majoring in elementary education here at AFSC and plans to teach upon graduation. On campus Sandra is a member of the Omega Club, BSU and the Laurel Wreath Society. Her hobbies include hunting, water skiing, painting and dancing. (Staff photo by Billy Hutton)

A.P. Playhouse Holding Auditions

Auditions will be held Wednesday evening, March 18, for the Austin Peay Playhouse Spring production, "Arms and the Man."

Those interested in entering the "Silver Opinion Competition" should contact Miss Hooper at Harvill Hall for entry blanks and for complete details concerning the competition rules.

She also has samples of 12 of the most popular Reed & Barton designs so that entrants can see how these sterling patterns actually look.

Through the opinions on silver design expressed by college women competing for these scholarships, Reed & Barton hopes to compile a valuable library of expressions of young American taste.

Auditions will be held Wednesday evening, March 18, for the Austin Peay Playhouse Spring production, "Arms and the Man," by George Bernard Shaw. Scripts have not been ordered, but a copy can be obtained in the library or from a COLLEGE TREASURY, the freshman literature book.

Set construction will begin shortly. Interested persons should check with Dr. David Mays or John Griffin, Speech Department.

The play will be directed by Dr. Mays.

Tri Beta To Hold Banquet Thursday Night

Ten biology majors and minors at Austin Peay State College will be initiated into Beta Beta Beta, honorary biology society, at their annual banquet, February 27, 6 p.m., at the Holiday Inn.

These members include Betty Jean Carter, Bernadine Francis, Judith Parrish, George Patterson, Rhonda Riggins, Floyd Scott, Lloyd Scott, Brenda Smith, Joe Vaughan and Howard Yarbrough.

The speaker for the banquet will be Dr. Theodore Delevoyars of Yale University, formerly professor of paleobotany at the University of Illinois.

His trip is being financed by the National Science Foundation and he is sponsored by the American Institute of Biological Sciences with headquarters in Washington.

Dr. Delevoyars will also speak to the biology classes on February 27 and 28.

Where There Is Smoke . . .

(ACF) — Smokey the Bear is a creep, insists The Guardians, City College of San Francisco.

Ever since the Animal Decency League gave him a pair of jeans and an old Mountie hat, he's been romping around the hills shaking his shovels at anyone trying to keep warm.

Are we to stay cooped up in our overcrowded cities just because one lousy bear wants to romp around in the woods?

This was not the idea of our founding fathers. They envisioned a great nation, stretching from shore to shore, not a sanctuary for a neurotic, honey-crazed brute. In our country's great western expansion, our ancestors met with many hardships such as starvation, bitterly cold winters and Smokey's ancestors.

But let's examine motives. Could Smokey be covering up something besides burnt-out campfires? In his fanatical efforts to stop happy campers from blazing up the forests, could Smokey be hiding his own hidden desires and transgressions?

Might it be possible that this docile brute in long pants actually is a pyromaniac? Perhaps those pockets in his jeans are hiding the big fellow's Ronson.

After all, someone has to keep Smokey in a job. And who sparks all those fires that are attributed to lightning?

Student Center Open Two Nights Each Week

Did you ever take a break in your studies at night and wish that you had a milk shake or realized the need for more graph paper? There was nothing you could do about it because the nearest drugstore was three blocks away.

Well, now you can take your break and have your shake. The Student Center will be open each Tuesday and Thursday night from 6:00 to 10 for the remainder of the year with the exception of exam and registration weeks.

This added convenience is sponsored by the Women Student Government (WSG), the Panhellenic Council and the Associated Student Body.

Miss Pat Cooper, WSG president, pointed out that the snack bar and the TV lounge will be open to the students.

In order to assist in the management and to cope with any problems which might arise, a representative from one of the sponsoring clubs will be present each night.

"I think that it needs to be open so that the students can have a place to get together besides the library," Miss Cooper stated. Informed of the change, Miss Susan Price, a junior English major from Wilmington, N. C., said, "Where else can you go on week nights? The Student Center is an excellent place to date and we should take advantage of it. Perhaps eventually it will stay open every evening."

BSU OFFICERS INSTALLED — Shown above are the newly installed officers of the Baptist Student Union at Austin Peay State College. (Staff Photo by Billy Hutton.)

BSU Officers Installed, Plans Announced

Jim Phillips, Larry Richardson and Carol Wilson were installed by John Billington, student director at UTMB, as president, Vice-president and secretary of the Baptist Student Union for 1964-65 at a banquet held last Friday night at the First Baptist Church.

Other officers for the year are: Miss Jessie Nell Fleming, publicity chairman; Miss Ann Frazier, co-devotional chairman; Miss Judy Griffin, enlistment chairman.

P. C. Lehman, co-devotional chairman; Gary Scott, editor of the newsletter, The Politician; Miss Paulette Scott, missions chairman.

John Steigh, Intramural chairman; Miss Barbara Smith, social chairman; Tommie Spurlin, music chairman; Russell Weatherwax, stewardship chairman.

Mrs. Margaret Treshers, instructor in English; Dr. Edward Irwin, associate professor of English and Floyd Brown, were selected as faculty advisors.

Outstanding activities for the remainder of the college year include a trip to the Southern Baptist Theological Seminary in Louisville for the Student Mission Conference, a spring retreat at Camp Linden and a basketball tournament to be held in Nashville with BSU teams from other colleges participating.

The prospects of a dedicated summer of service lie ahead for four members.

Miss Scott will go to Pensacola, Fla., to work in the Goodwill Center.

Paul Dickens, past president of the BSU, will go to the Tennessee Work Camp at Lincoln Memorial University. Weatherwax has been named as his alternate.

Phillips was selected as an alternate for the Indiana Revival Team.

In keeping with a growing APSC, the BSU is in the process of raising funds for a Baptist Student Center by personal contributions and work projects. The Center which will be located adjacent to APSC at 311 Home Avenue is expected to be built within the next three years.

Phillips, an English major, is a junior and the son of Mr. and Mrs. Macon Phillips of Paris, Tenn.

Richardson, the son of Mr. and Mrs. W. R. Richardson of Crofton, Ky., is a sophomore majoring in biology.

Miss Wilson is a sophomore majoring in history. She is the daughter of Mr. and Mrs. Reams Wilson of Big Rock.

Master Plan Of Proposed Ten Year Expansion At Austin Peay State College

New Library Proposed By 1965

Two advisory committees to President Joe Morgan are steadily working on the planning of the proposed library and student union buildings.

Dean Tom K. Savage is chairman of the advisory committee in planning the student union building while Dr. Thomas Cowan is chairman of the library planning committee.

Other student union committee members include Dean M.P. Bowman, Dean Mabel Mescham, R. C. Shastee, Earl E. Sexton, Sherwin Clift, Charles Young, Dr. Fred Burger and Tillman Taylor.

Besides Dr. Cowan, the library committee is composed of Dr. Leon Ebb, Dr. Burger, Miss Mildred Deason, Miss Johnnie Givens, Dr. Preston Hubbard, Melburn Mayfield, Dr. Haskell Phillips, Joe Suttin and Dean F. G. Woodward.

The library committee was appointed in July, 1962, and held its first meeting shortly thereafter. The committee spent a year in planning and developing a statement of building program to be presented to the architects. They were assisted in this planning by Dr. Ralph Ellsworth, director of libraries, University of Colorado, and Martin Van Buren, library interior planner, Charlotte, N.C.

The approved statement of building was presented to President Morgan in July, 1963. He approved the program in mid-October and instructed the architects to begin preparing provisional preliminary drawings.

On February 4, 1964, these drawings were approved by the faculty planning committee and the architects have been advised by President Morgan to proceed with the drafting and working drawings of the building.

The program as developed by the committee is a 10-year plan based upon projected growth of enrollment and library holdings. The planning has been such that the first unit will possibly be only a five-year unit with an addition being necessary almost immediately after occupancy of the building in 1965. The completed 10-year planned program will be

constructed so that it forms the basis for additional construction which could carry the library needs of the campus into the future.

Turning to the student union committee, weekly meetings are being held to determine the priority needs which should go into a modern student union building. Following the determination of such needs, the committee will follow a pattern similar to that of the library committee.

Expansion

(Continued from Page 1)

feared land to finance the construction of 42 units of married student housing to be located on land lying one-half mile northwest of the campus. The land was recently deeded to APSC by Pat Henry Cross.

It should be understood that the master plan as portrayed here is not a blueprint, but does indicate direction, extent and type of facilities needed for the orderly development of the campus for the next 10 years.

Presently the college plant consists of 50 acres and 33 buildings (17 major buildings). The master plan calls for the college facilities to move in the directions of north, east and west. Traffic patterns and campus parking will also be a major part of the development program.

Turning to enrollment it is estimated by the long-range planning committee that at the present rate of growth, campus enrollment should reach the already mentioned 3,600 to 4,200 students by 1974. These figures represent the average of estimates derived from two studies: The Southern Regional Education Board and the State Department of Education and President's Council. The figures sharply contrast with the 2,228 students who registered for the 1963 fall term.

In order to bring to the student body the music of Don Jacoby, noted trumpet virtuoso, the regular assembly will be moved to 10 o'clock tomorrow.

Classes scheduled for tomorrow at 10 will meet today at 10.

Morgan

(Continued from Page 1)

State Board of Education in its November, 1962, meeting upon the recommendation of Sexton, then acting president of APSC and president-elect Morgan, then state commissioner of education. The Board authorized the President to obtain the services of a consultant for campus planning.

The long-range planning committee was charged with the responsibility of recommending to President Morgan a long-range plan — approximately 10 years — for the development of campus facilities. This plan involved a study of enrollment projections, the kinds and amount of facilities needed, proper use of existing land, the amount and location of land to be eventually acquired and the development of campus parking and traffic patterns.

The committee was concerned

with orderly development involving land use and the grouping of buildings according to function (instructional, service, etc.). The committee with the guidance and assistance of Hamilton began work in March, 1963, and continued through the following months until the plan was submitted to President Morgan in July.

A special committee of the State Board of Education visited the campus July 8, 1963, and heard the report given by President Morgan and the special committee of the Board presented the report to the State Board of Education at its regular meeting in August, 1963. The Board gave formal approval to the plan of campus development and expansion.

The master plan (shown here) was prepared by Hamilton's staff and represents the artist's (Bob Davis) conception perspective of the campus by 1974.

Admission

(Continued from Page 1)

his principal as ready for graduation from the high school with his own class, after successful completion of an academic year at Austin Peay state College.

A variation of this plan permits students from Clarksville High School to have dual registration in the College and the High School. College credit earned by the student will count as both collegiate credit and secondary school credit (to the extent needed).

In addition to his high school record, the student will have to score in the 91 percentile or better on the American College Test.

Afterwards he will be interviewed by a committee of the faculty to secure additional evidence that the student is sufficiently mature socially as well as intellectually to profit from the early admission program.

FIRST COME, FIRST SERVED — Although construction of the new men's dormitory has been underway only a month one APSC male student has decided he will take his position and wait for the opening of the modern building. With packed bags and trunk the hopeful young man watches intently as the construction continues. (Staff Photo by Billy Hutton)
