Phillips Publishes Research Papers

Dr. Haskell C. Phillips, professor of biology and head of the biology department has recently had two scientific papers published. They are — "Growth Rate of *Parmelia Isidiosa*," which appears in the current issue of the JOURNAL OF THE TENNESSEE ACADEMY OF SCIENCE, and "Foliose and Fruticose Lichens from Tennessee," published in the latest edition of THE BRYOLOGIST, which is the official publication of the American Biological Society.

The data for "Growth Rate of *Parmelia Isidiosa*" was collected over a three year period. Work on "Foliose and Fruticose Lichens from Tennessee" was started in 1957.

Dr. Phillips studied the lichens with Dr. Mason E. Hale

at the Smithsonian Institution in Washington in the summer of 1960. He also made the pictures of the lichens, which are written by Dr. Hale and published by the Smithsonian.

Dr. Phillips is continuing his active research program on Lichens of Tennessee. He has discovered a new antibiotic in one of the lichens, and he and Mr. Benjamin Stone, instructor of biology, are pursuing the research on this substance. They are trying the substance on various microorganisms.

Dr. Phillips is also investigating the effects of certain plant growth regulators on Tennessee Lichens. These studies are being conducted on the Cumberland Plateau.

BMOC Club Started

If someone tells you that he is a BMOC (Big Man On Campus) don't jump to the conclusion that he is conceited.

It may just be that he is a member of the BMOC Club, a new club at Austin Peay State College which has as its main objective promoting good will on campus.

The club was initiated by Paul Dinello and Bill Gibbs.

Dinello serves as the club president while Gibbs serves in the capacity of vice-president.

Members for the club are chosen by a six-man council. The members of the council are Claude Clements, Jerry Burillon, Tom Jones, L. M. Ellis, and Tom Kocica. Club membership is limited to 45 members at one time.

In order to obtain its objective of good will, and also to keep its members and the APSC campus looking sharp, the club has set up a group of rules for the members to follow. The rules are:

1. Members must promote good will on and off campus.
2. Members must be neat and presentable at all times.
3. Members must promote brotherhood in the club.
4. Members must participate in club activities.
5. Members must promote a better social life on campus.
6. White socks are not allowed when wearing a suit and tie.
7. The club will be operated on a group and not an individual basis.
8. Members must show proper respect to authority.
9. Any member found violating the club rules will report in front of the council, and a fine will be imposed.

A record enrollment of 2,228 students entered Austin Peay State College this fall according to figures released from the office of President Joe Morgan.

The enrollment represents an increase of 110 students over the number of students who enrolled at the beginning of the fall quarter in 1962.

Kappa Delta Pi Schedules Events

The Eta Rho chapter of Kappa Delta Pi has announced its calendar of events for the 1963-64 school year at Austin Peay State College. Included on the calendar are the following events:

October 28, 1963 — 7:30 p.m. Clement Auditorium, Speaker: Dr. Dave Denton, Assistant professor of Psychology, APSC.

November 26, 1963 — 7:30 p.m. Christian County High School, Hopkinsville, Ky. Symposium.

January 28, 1964 — 7:30 p.m. Burt High School, Speaker: Dr. James Hobbs, David Lipscomb College.

March 3, 1964 — 6:30 p.m. Clarksville Country Club, Dinner meeting. Speaker: Dr. Hal Ramer, coordinator of higher education in the Tennessee State Department of Education.

April 28, 1964 — 7:30 p.m. Fort Campbell High School, Fort Campbell, Ky. Speaker: G. W. Brooks.

May 26, 1964 — 7:30 p.m. Clement Auditorium, Speaker: Dr. Harold S. Pryor.

A review of the enrollment figures for their preceeding three years shows a definite trend toward a continuing growth at APSC.

In 1960 the total enrollment was 1550; in 1961, 1979; in 1962, 2188; and this year, 2228.

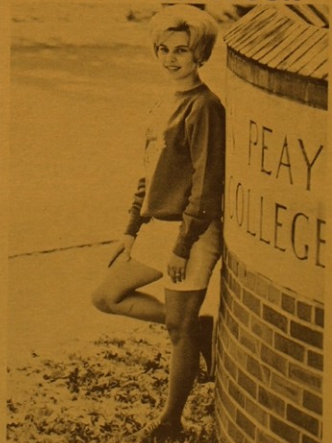

Included in the number of students enrolled in this year's total are 1508 men and 720 women. By classification, there are 960 freshmen, 458 sophomores, 360 juniors, 328 seniors and 79 graduate students.

A further breakdown shows that there are 955 men and 532 women that are full time residence students; 86 men and 72 women who are regular day, part-time students; 317 men and 47 women attending night classes only; nine men and 49 women attending undergraduate classes on Saturdays; and 44 men and 35 women in graduate classes.

Figures from the Fort Campbell Extension Center reveal that there are 125 students enrolled. An additional 17 students are enrolled in the in-service extension courses at Linden, Tenn.

The English 101 exams will be given Thursday at 4:30 in the assigned classrooms.

Coed Of Week

COED OF THE WEEK — Miss Lillie Taylor, a bouncy 5.6, 115 pound vivacious young lady from Dixon, Tenn., is this week's selection as coed of the week. Lillie is a health and physical education major with ambitions of teaching when she finishes her college days. This hazel eyed blond has measurements of 36-25-36 and is a member of the sophomore class. Among her activities at APSC are the Governesses, student council representative for the freshman class, secretary of the sophomore class, member of the Omega Club and the Physical Education Majors Club and she works on the annual staff.

Attention: All Seniors Majoring In Education

All education seniors, including those who will complete their requirements next August, who will graduate in the class of 1964 will be required to take the National Teacher Examination (NTE) on February 15 as a part of their graduation requirements. Although it is required, the scores from the NTE will not change the senior's graduation status.

The NTE will consist of a Common Examination, testing the prospective graduate's professional knowledge and general educational background, and one or two of the 13 Optional Examinations, measuring mastery of the subjects he plans to teach.

Scores on the NTE are used by many large school districts for employing new teachers, and by several states for granting teaching certificates for licenses.

Registration for the tests opens

November 1 and closes January 17. The fees are nine dollars for the Common Exam which is required of all applicants and two dollars for each Optional Exam which is taken at the applicant's initiative. The advantage of taking the latter is that, if it is later desired or required by the applicant's school system, there will be an additional charge of five dollars for re-registration.

The seniors are responsible for registration. The College will not be responsible for notifying any senior that he is not registered. Registration will be made directly through the Educational Testing Service of Princeton, N. J. Forms for registration will be available through Dr. George Ackley's office between 8 a.m. and 4 p.m. by November 1.

Further announcements concerning NTE will appear from time to time in The All State.

THE ALL STATE

The All State is the official newspaper of the Austin Peay State College. It is published every Tuesday during the academic year, except for examination periods and holidays, under the general management of Sherwin Cliff, Director of Public Information.

A Tribute To The Forgotten

Homecoming 1963 for Austin Peay State College is over and there are several students who are sad. These students are the ones who did all the work which made this year's activities the best in the history of the school.

Although there were only a few students who did the majority of the work, they are not complaining. They are the ones who got the most out of homecoming. Certainly they were tired and complained a little about having to do the work while the rest of the student body did nothing, but now they can see that all the work was not in vain.

The alumni who returned to the campus for the weekend's festivities had a very enjoyable time. They left feeling they were really wanted by this year's student body.

Of course the entire student body has taken credit for the work done in preparation for homecoming, but there are those who did the work and know the trouble they went to in preparing for homecoming. A special thanks should go to those students because of their time and effort in making homecoming the success that it was.

To say that these students are sad is a correct statement because they know it will be another year before they will have the chance to join forces and show the rest of the people at the College that they are capable of doing the impossible.

There will be other activities during this year which will be labeled impossible by many and yet the same group of people who are willing to take a chance will do so again. They will realize that they are capable of overcoming any and all odds and these students will accomplish the impossible.

For you students who did not join in the fun of preparing for homecoming, we say, "You were the losers. We had a 'ball' in the work that we did and we wish we could do it more often. We are sorry that you did not join us and we missed you. Maybe you won't forget to come out and help us next year."

Yes, homecoming 1963 is over and there are a few sad students, but the school year is not over. There will be other activities coming along which will require the whole-hearted support of the student body.

Ramblings Of A Fool

By Ronald Arvin

Numerous readers have asked where I obtained the axioms used in the first issue of The All State. Those and the following axioms are part of a collection of originals which I had written over a period of four years.

Why shouldn't we love our enemies? We are the ones who made them.

In order to learn to live with others, we must first learn to live with ourselves.

One of the great paradoxes of the Ages is the person who dislikes all Jews but worships the King of Jews.

To have a good friend to accompany one through life is a gift of God.

Experience is common sense learned the hard way.

A little time plus a little understanding can accomplish the impossible.

It is the sad times which make the good times seem so good. The American laughs at the Oriental for binding the feet of the girls so that they will have small feet. However, the American is a thousand times more foolish when he binds his children's minds with social prejudices.

I will not give serious regard to a cause or a principle to live by until I see it in use by those who profess it.

The man who acts as if he owns the world usually owes the world.

It has always been a great puzzlement to me that the one rotten apple can spoil the whole barrel but, try as they may, the other hundred apples could not ripen the rotten.

Down my end of the hollow is a home economics teacher who instructs her young charges to place shandkerchief over their lips when they kiss their boy friends in order to prevent the acquisition of germs. This is like eating an orange with peeling still on it — It's not quite as juicy nor half the fun.

Isn't it funny — how the other guy is always wrong?

If all the tests given during a quarter were placed end to end, some professor would still expect you to complete them within an hour!

The fool who said that morality is old-fashioned also said that boats float better without bottoms.

Few teenagers realize that the flipside of freedom is responsibility.

Sexual freedom is often misinterpreted to be sexual license. In sowing their wild oats, some college students remember that "whatsoever ye shall sow, so shall ye reap" and frantically hope for a crop failure.

Attention Students

FROM THE DESK OF TOM K. SAVAGE, DEAN OF STUDENTS: Since we are now members of the OVC, we look forward to increased attendance at our games and we need to plan the most effective arrangements for handling and seating.

We have been considering having the Student Gate on the East Side of the Stadium and designating a portion of the East Stands for APSC Students, Band and Government and Cheerleaders. (The East Stands are those opposite the pressbox.) This is the arrangement used by Clarksville High School.

Faculty, staff, and student organization leaders who have concern in this matter are asked to meet with me in Room 204, Browning Building, Thursday, October 24 at 10 a.m. At this time, we shall initiate preliminary discussions which, we hope, lead to an effective solution. If interested, please attend; if you cannot attend, pass your reactions along to me.

Poll Discloses Desire To Open Library On Sunday

If the library was open on Sunday afternoons, would you make use of it?

Billy Jackson, freshman, history, Dickson: "I think so because I like to get my lessons on Sunday."

Dean Dotson, freshman, history, Dickson: "I believe so because I go home on the weekends and I come back on Saturday afternoon, and if the library was open I could get my lessons then."

Paula Shaffer, freshman, music, Mount Vernon, Ind.: "I would use it because I think Sunday afternoon is the ideal time to study."

Jeanne Durham, freshman, art, Gallatin: "I would use it then because that is one of the only times I have to study."

Lee Arciszewski, freshman, music, Washington, D. C.: "Yes, I would use it and all out-of-state students could use it on Sundays because they have no place else to go. If they have reference work to do, they could do it then instead of later."

Steve Fairbanks, junior, marketing, Rochester, N. Y.: "Yes, because Sunday is when I do all my studying and if the library was open, it would help me."

Nettie Shurtz, sophomore, art

Clarksville: "Yes, if it was open, I would stay at school more often because I would have a place to study."

Douglas Helton, junior, business, Lebanon: "Yes, I would because one certainly cannot study in the dorms."

Ben Garrett, junior, history, Charlotte: "I do not think the library should be open on Sunday because I do not think there would be enough students here to use it. I would not use the library on Sunday because I am not on campus on Sunday."

Beverly Mathews, senior, elementary education, Clarksville: "I don't think the library should be open on Sunday because there wouldn't be enough people using it."

David Elliott, freshman, physical education and health, Nashville: "I think the library should be open on Sunday to give the students a quiet place to study."

Sandy Williams, freshman, history, Hopkinsville, Ky.: "I think the library should be open after church on Sunday because students are usually busy through the week with classes and on Saturday with their laundry. This would give them an opportunity to get caught up on their work."

Sigmund Freud: Who Was He?

FREUD AT 80

Heraclitus said, "The soul of man is a far country which cannot be approached or explored." Sigmund Freud was the man who journeyed to that "far country" and, in doing so, became known as the Father of Psychiatry. Freud began his career in psychotherapy in the 1890's when he abandoned the hypnosis treatment of hysteria in favor of free association or the "talking out" method.

The "forgettings" observed in his patients' recitals formed the basis for his theory of repression. From this observation he developed the techniques which he called psychoanalysis in which he recognized the importance of the interpretation of dream symbols, forgettings, and slips of speech for uncovering repressed wishes. He believed that by bringing these unconscious desires to the patient's consciousness, the patient could replace them with acceptable desires.

In 1933 the Nazi burned his books in Germany and he was ransomed by Countess Napoleon after the Germans occupied Vienna in 1938. Freud went to London where he died on Sept. 23, 1939.

His struggle against unpopularity in the medical world, his success and failures in opening the human mind, the ransoming from the Nazis — all are highlighted in one of the most brilliantly written plays of all time, "The Far Country". The APSC Playhouse is now in the process of rehearsing this play to be presented on November 6, 7, and 8.

Laugh a Day

Candidate—"I'm pleased to see such a dense crowd here tonight."
Voice—"Don't be too pleased, mister. There's not all dense."

FINAL NOTICE

This is the last call for pictures for the annual. All students who have not had class pictures or retakes made are to go by Dancy's Camera Studio this week. After Saturday there will be no more pictures made. All proofs are to be decided upon also by Saturday. The Greek letter clubs are to have their pictures made by Saturday and the proofs decided upon as soon as possible.

MEET THE BIOLOGY DEPARTMENT—The APSC Biology Department teachers are (l. to r.) Dr. Haskell Phillips, department head, David Snyder, Dr. William Ellis, Ben Stone, Dr. Floyd Ford, Billy Cole, John Grear and Marvin Provo.

Biology Department Spotlighted This Week

Dr. Haskell C. Phillips, chairman of the biology department, has held that office since 1952. Starting his twenty-fifth year of teaching, Dr. Phillips said, "That may be a long time, but I started as a very young man."

Other instructors in the department are Billy C. Cole, William Ellis, Floyd M. Ford, John W. Grear, Jr., Marvin Provo, David H. Snyder and Benjamin Stone. In addition to these instructors are two part-time teachers — Kenneth Stier and Sharon Mar-segla, who have graduate teaching scholarships.

The biology department is located in the McCord Building. The department has four classroom laboratories and one research room. Plans for a freshman laboratory that will seat 36 students are being made, and within the next four years, two additional classroom laboratories will be added.

Dr. Phillips further commented that "biology is helpful to any student because it is a life science and students are interested in it because they study about themselves."

Field trips are also a great part of the biology program. Tree identification is a phase of area of biology. This is very obvious by the bare branches of trees within reach of leaf-eating students.

In 1953, the department had only three teachers, one of whom taught only part-time. Also at that time, there were only one microscope for every two students whereas now there are enough microscopes for all the students to have one.

The department is in the process of re-working its graduate program. More courses will be added and substituted in order to put more stress on research. Dr. Ellis, who is back with a Ph. D. degree after three years at the University of Tennessee, is continuing his research on the red maple.

Provo, a student here in the late 1940's is the only new addition to the staff this year.

The biology department has an active national honor society, Tri Beta, for biology majors and minors. Jimmy Myrrell is its president at this time.

Former Teacher Receives New Position

Mrs. Beatrice Lowe, former instructor at Austin Peay State College, has been named supervisor of elementary physical education and secondary girls physical education in the Tulsa, Okla., public school system.

Mrs. Lowe taught at APSC during the years from 1944 to 1947. Since leaving Clarksville she has taught at Pennsylvania State Training School and Charter in Pennsylvania; Sturteff College and Western Military Academy in Ill.; and at Webster High School and Clinton High School in Okla.

Mrs. Lowe's husband, Dr. Marvin E. Lowe, is professor of history at the University of Tulsa. He was a professor of history at APSC from 1941 to 1947.

Tony's Tidbits

By Tony Boehms

Govs Show Spirit

Saturday, a spirited Governor squad played what was probably the best effort in several years of football at APSC. The only indication of this effort was a 0-7 defeat; a margin many schools would have settled for against the current OVC runner-up.

The Gov attack penetrated into scoring position four times, running plays requiring sheer determination on the part of the undersized backs.

Then, there was the problem of how far the ball had to be moved in order that the Govs were rewarded a first down. It seemed to be a question all night long of should the ball be placed here where the player fell with the ball on one or two yards back where he was "fiddled" by a defender. As one anguished supporter said, "We have to move the ball 12 yards before we get a first down."

Unfortunately statistics have no bearing on the final score so we must depend on the breaks to produce a winner. Thus we can attribute the outcome of the game, but as the odds continue to fall the time should come when Governor football emerges victorious.

The Govs will have two weeks to prepare for the Nov. 1 encounter with Middle Tenn. State. This will allow time to patch up some injuries and work toward a victory.

The Scouting Game

The game of football has a variety of requirements in order that a team may be adequately equipped to face the opponent. One of the most unknown and underrated jobs for the coaching staff is scouting.

Ironically, we tab any of the coaches' time away from practice or games as "spare time" but this time is unquestionably filled. The coaches have a rigorous schedule every week, looking at films, seeing games and inquiring about opponents.

On Sunday, the films on the game of the night before are viewed by the coaches along with the players. Then from Tuesday or Wednesday on, films of the weekend opponents are studied and restudied.

Friday night the coaching staff divides and travels to several of the area high schools to observe prospects. Though they are restricted to a 150 mile radius three or four games are seen by the coaches. Frequently a coach will leave for an East Tenn. game early Friday morning and therefore cover a larger area.

Saturday night two or three coaches are sent to scout the opposition for the following weekend and another is sent to scout an opponent scheduled two weeks ahead.

In addition to these coaches' eye-views, several long distance calls are made during the week to coaches who have already played our opponent for the week.

Finally, toward the end of the season, the remaining "spare time" is spent viewing films of prospective players and recruiting new players for the next fall.

Govs Bow To Morehead 7-0

The Austin Peay State College Governors played an inspired brand of football against Morehead State before a homecoming crowd of 4800 at Clarksville Municipal Stadium Saturday night. Despite the 7-0 losing score, the Govs played their finest game of the season.

Against what has been called the "toughest first team in the OVC," the Governors picked up 18 first downs and 166 total net yards rushing. Individual rushing leader for the Govs was fresh-

man fullback John Ogles who picked up 47 yards in 11 attempts.

The Governors missed their first scoring opportunity early in the first quarter when quarterback Carlton Platt fired an incomplete pass from the Eagle's 11 yard line. The ball went over on downs to Morehead State who then made the game's lone score. The 89 yard TD drive was culminated by a 27 yard play from quarterback Mike Gottfried to end Jack Smith. Tally

Johnson kicked the point after with 3:20 remaining in the first quarter.

During the second quarter the Governors again came close to crossing the goal line. They marched from their own 6 yard line to the Eagle's 15 before another incomplete pass, this time from Rodney Rogers, put and end to the drive.

When play resumed after half-time festivities, Tim Chilcutt returned the kickoff 25 yards to the Govs' 38 yard line. During the drive which ended at Morehead's 14, quarterback Platt completed a 13 yard pass to end Mike Jenkins for one of the four APSC first downs of the quarter.

In the fourth quarter, the crowd was brought to its feet by two long pass plays from Carlton Platt to Chilcutt. The first play resulted in a 27 yard gain and the second another 20 yards.

Back Of The Week Lineman Of The Week

Carlton Platt, 5-10, 152-pound junior quarterback has been selected back of the week. Platt gained 40 yds rushing and completed six of 12 passes for 77 yards against Morehead. Carlton also played a tremendous defensive game, intercepting a pass and making four tackles and six assists.

Mike Jenkins, 6-3, 190-pound freshman, is the coaches' pick as Lineman of the week for his defensive play against Morehead last Saturday. Head Coach Bill Dupes said "Mike's end play was the finest we have had all year." Mike played over 50 minutes of the game and made four tackles and one assist.
