*	*	4,989	+11.8%	353	-3

ADDITIONAL INFORMATION

- The state has changed the way they are reporting data again. It is much harder to find relevant data and more difficult to update. It is still reported on a weekly basis, which makes the state reported data less relevant for decision making. We are able to track the daily percent positive rates from our campus testing however. That should be of help in decision making.
- Numbers for 1/29/2022 reported as of 2/2/2022. We are at or near all-time high in both positive tests and in % positive tests. This is reported cases only this does not count positive cases that are done using home kits. Cases are continuing to remain steady at high levels.
