

Standing Committee Annual Report

Name of Committee or Council:

Health Promotion Committee

Chair:

Kadi Bliss

Meeting Dates in Current Year:

8/29/22, 2/7/23, 4/17/23, outside of these full committee meetings, we met as small sub-groups throughout the fall and spring to accomplish committee tasks.

Major Actions or Accomplishments:

During the fall 2022 semester we accomplished the following:

- Our committee administered the National College Health Assessment (NCHA):
 - a) We developed marketing materials and posted them around campus.
 - b) We held tabling events to encourage students to participate.
 - c) We posted announcements to market the survey.
 - d) We worked closely with ACHA to ensure solicitation emails were sent at the appropriate times and the survey was being administered smoothly.
 - e) We notified incentive winners and highlighted those students on social media.

The survey was administered for a three-week period during the fall semester. A total of 324 respondents took the survey. The final results package was emailed to us during the winter break. A research team is currently analyzing results based on an IRB application/approval.

- Our committee also hosted a sexucation expo in partnership with the Syndemic Alliance. The event was held October 26, 2022.

During the spring 2023 semester we accomplished the following:

- Our research sub group analyzed NCHA data according to our IRB approval, and we have applied for a pre-semester calendar panel presentation to share results with the larger APSU community.
- Our committee partnered with Music City Prep to host a sextacular fair. The event was held April 18, 2023.
- Partnered with public health undergraduate students to learn about what campus stakeholders are concerned about in the area of health promotion. Students presented evidence-based programming ideas based on stakeholder feedback at our 4/17/23 meeting.
