ADDITIONAL INFORMATION

- The on campus positive rate was last this low on December 7, 2021.
- Numbers for 2/24/2022 reported through 2/19/2022. Cases continue to decline from the peak one about a week or two ago. The percent positive tests are slightly below the previous peak highs in September. It is notable that the numbers are leveling off and potentially staying around 100 cases per day which is still relatively high. There have been 8 deaths over the last 7 days, this is 30 deaths over the last three weeks. This is likely due to the late reporting or from patients in the peak of Omicron.
